Part 1 Motion Sensors

✓ Built-in Integrated Design for OEMs

Overview:

■ Bluetooth 5.0 Mesh Enabled Sensors (with App)	32-34
■ Sensors with True Presence/Absence Detection	35-35
■ On/Off Version	36-37
■ 0/1-10V Output (tri-level dimming / daylight harvest)	38-39
■ DALI & DALI-2 Output (tri-level dimming / daylight harvest)	40-41
■ Human Centric Lighting & Tunable White Control	42-43
■ RF (primary & secondary control)	44-44
■ Mid-bay & High-bay	45-46
■ Zhaga Connection	47-48

Introducing: 6 Categories of Sensor Head Options

■ Category A: Non-Bluetooth Control with 1-10V/DALI dimming	80-84
■ Category B: Bluetooth Control (Bluetooth in Sensor Head) with 1-10V/DALI dimming	85-87
■ Category C: Bluetooth Control (Bluetooth in Control Base) with 1-10V/DALI dimming	88-91
■ Category D: Non-Bluetooth Control with On/Off Switching Only	92-93
■ Category E: Non-Bluetooth Control with Dip-Switch Settings	94-95
■ Category F: Sensor Head Only (for Integration into a Third-party LED Driver)	96-96

✓ Stand-alone Sensors for Projects

Overview:

■ Bluetooth 5.0 Mesh Enabled Sensors (with App)	98-103
■ Sensors with True Presence/Absence Detection	104-104
■ On/Off Version	105-107
■ 0/1-10V Output (tri-level dimming / daylight harvest)	108-109
■ DALI & DALI-2 Output (tri-level dimming / daylight harvest)	110-116
■ Human Centric Lighting & Tunable White Control	117-122
■ Dual-sense (HF+PIR)	123-124
■ Batten-fit / Bolt-on Mount Style.....	125-125
■ RF (primary & secondary control)	126-126
■ Mid-bay & High-bay	127-132
■ Trailing Edge Output	133-133
■ Products for Special Applications	134-135
Full Product Specifications	136-177

Part 2 LED Drivers

Overview:

■ Bluetooth 5.0 Mesh Enabled LED Drivers (with App)	179-180
■ DALI-2 Output (with Switch-Dim)	181-182
■ DALI & 1-10V Output (with Switch-Dim)	183-186
■ Human Centric Lighting & Tunable White Control	187-188
Full Product Specifications	189-200

Part 3 Driver+Sensor Combo 2-in-1

Overview:

■ Integrated Design	202-202
■ Bluetooth 5.0 Mesh Enabled LED Drivers (with App)	203-204
■ Detachable Sensor Head Design - - - Non-Bluetooth	205-207
Full Product Specifications	208-218

Part 5 Modular Wiring System

■ System Introduction	231-235
■ Overview of Products	236-237

✓ Switching Products

■ Connection Boxes	238-242
■ Ceiling Rose	243-243
■ Cables & Plugs	244-245
■ Pre-wired Motion Sensor Options	246-247

✓ Dimming Products

■ Connection Boxes	248-269
■ Ceiling Rose	270-270
■ Cables & Plugs	271-273
■ Pre-wired Motion Sensor Options	274-282

Part 6 Dimmers & Controllers & Switches

Overview:

■ Dimmers/Cotrollers/Switches for Projects (built-in junction box)	284-285
■ Dimming/Switching Modules for OEMs (built-in luminaire)	286-286

Full Product Specifications	287-291

Bluetooth® 5.0 SIG Mesh Eco-system

Hytronik is the market leader for motion sensor technology in the professional lighting industry. We deliver high quality controls to the high-end professional lighting manufactures worldwide. With our strong R&D competence, we are now gearing towards Bluetooth lighting control solutions and building up a complete ecosystem of Bluetooth products.

Our eco-system consists of motion sensors, LED drivers, emergency control gear, dimmers, gateway and other components such as touch panel and quick connection box. We also cooperate with Koolmesh, Casambi, Silvair and EnOcean to provide a wider range of Bluetooth lighting control solutions.

With server based in Europe, our cloud service supports remote control via gateway, emergency report generation, remote monitoring, and IoT features etc. Meanwhile, we are open for all kinds of customization possibilities at affordable prices, including the product, app, cloud and server.

With dedicated phone/tablet app and web platform, Hytronik Bluetooth solution caters for small-scale installations such as residential and large-scale installation in commercial and industrial applications. For new projects, or retrofit upgrade projects, the Bluetooth products have significantly reduced the labor cost for wiring thanks to the wireless mesh networking. Besides, not only does our powerful solution fulfill the challenging requirements in real application, what's more, the whole setup and commissioning process has been simplified with synergy of intuitive user interface and strong technical support from Hytronik team. Meanwhile, future maintenance and on-site troubleshooting has never been so quick, simple, and flexible!

Koolmesh's Bluetooth Chip –nRF52840

Koolmesh's Bluetooth system is built on our in-house developed module KMB02, in which the chip core is Nordic nRF52840. With the adoption of nRF52840, Koolmesh's system allows for powerful features such as:

- ▶ Bluetooth 5.0 long range (30m in-door, 50m in open air)

- ▶ OTA via Mesh/Gateway level (Batch OTA upgrade remotely)

Take a Closer Look into the Powerful Bluetooth Features

1.

Wireless mesh-network grouping enables synchronized control with minimized labor hours and no hard-wiring hassles.

Batch commissioning significantly saves labor hours – Once and for all!

3.

Scenes setup and recall

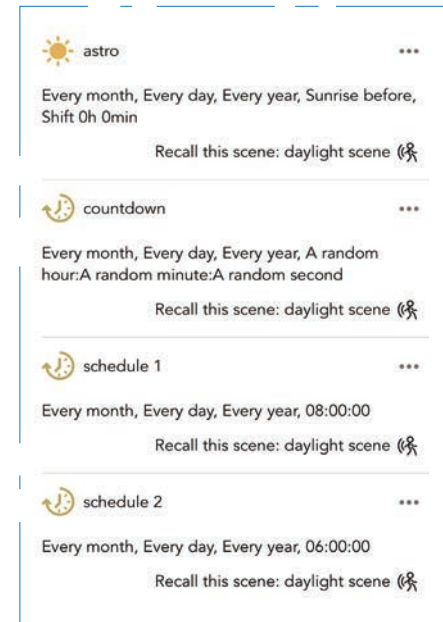

- Recall by schedule
- Recall by sensor trigger
- Recall by PUSH switch
- Static & Dynamic scene

2.

Schedules & Astro-timer

- Support multiple timers
- Count-down timers
- Sunset & Sunrise timers

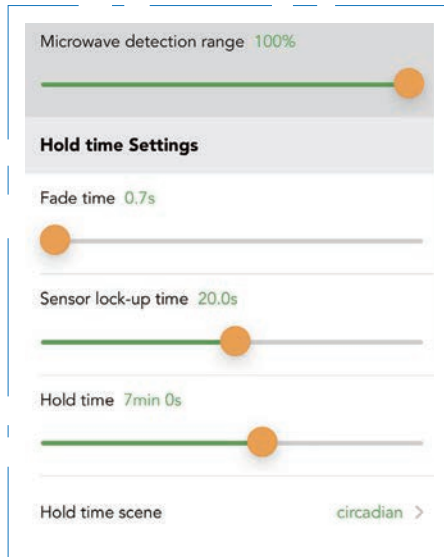

4.

Floorplan with emergency report generation

- Design layout on floorplan map
- Emergency management system
- Run emergency tests with automatic report generation

5.

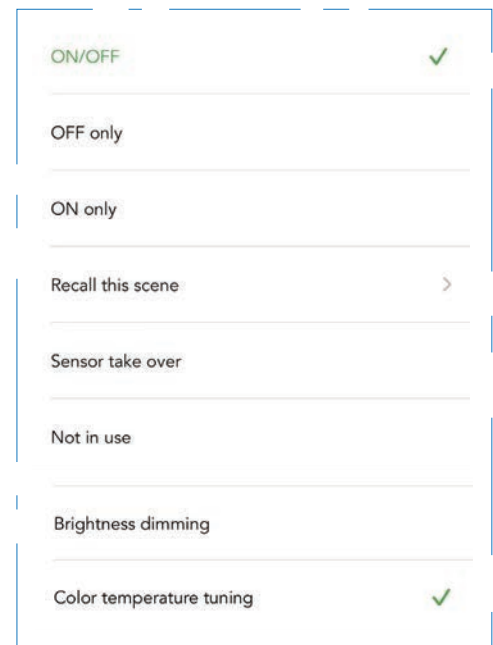

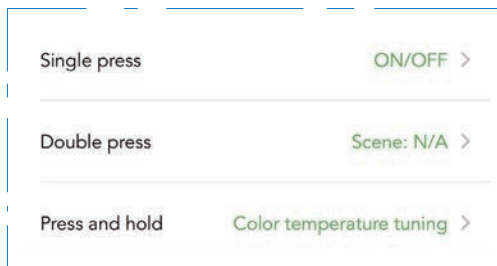

Professional motion sensor settings

- Sensitivity setting
- Lux threshold setting
- Hold-time and Stand-by time setting
- Auto mode (Presence) / Semi-auto mode (Absence)
- Fade time (soft-start & soft-off) setup
- Daylight control prior to motion control

6.

Re-define PUSH/retractive switch functionalities!

Assign functionalities to different buttons according to different actions:

7.

Enhanced daylight harvest/interaction experience

- Visualized daylight setup
- Open loop & Closed loop
- Drag and play!

8.

Super intuitive circadian rhythm (Human Centric Lighting) control

- Visualized 24h Dim & CCT level arrangement
- Personalized adjustment on Dim & CCT curves
- Combined with motion sensor and lux control
- Drag and play!

10.

Future-proof OTA firmware upgrade

- Easy trouble-shooting on-site
- Quick project upgrade
- Easy project site maintenance

9.

Staircase function

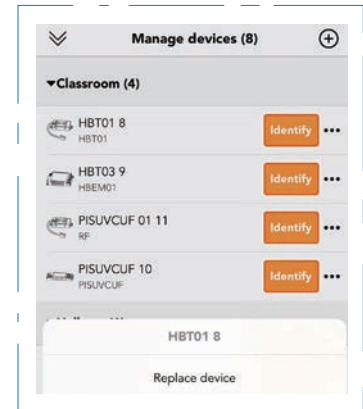

- Simplified staircase setup
- Perfect replacement for RF grouping

11.

One-key device replacement

- Automatically obtain the parameters from the previous device
- Reduce operation & maintenance response time

12.

Authority & Permission management

- Different permission levels for different roles
- Network sharing through QR code / redeem code
- Ownership transfer from installer to project manager

Workflow for New Projects

1 Stage 1 -- Design

The project designer applies layouts to floorplan at home through web app platform.

- Create projects & networks
- Insert floorplan map layout
- Pre-set zones
- Assign configuration profiles to the zones

2 Stage 2 -- Installation

The installer comes to the project site, and uploads the pre-set configuration profiles directly to the luminaires through Koolmesh Pro app on iPad.

- On-site installation
- Add devices to the pre-set zones
- The pre-set onfiguration profiles will automatically sync to devices

3 Stage 3 -- Management

Commissioning done!

- All data & analysis can be viewed and managed by the project manager/owner through web app platform.
- The end users can be given different permission levels and have their own preference/personalized settings through smartphone app.

- Automatic report generation
- Energy consumption management
- Sub-users permission management
- Scheduled emergency tests
- Heat map

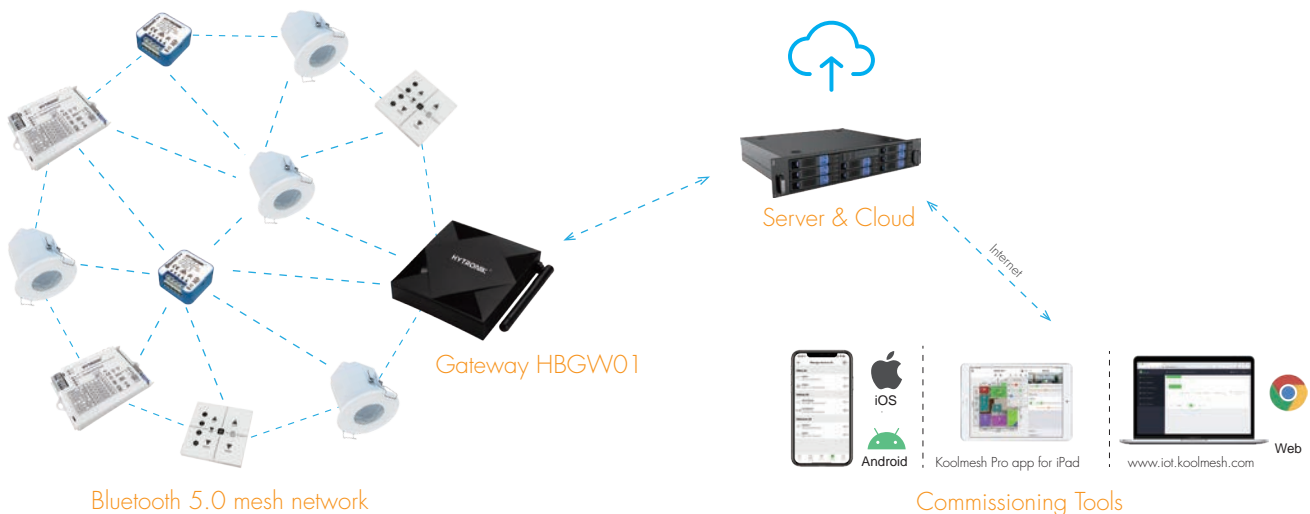

4 Stage 4 -- Maintenance

Future maintenance is very simple and explicit!

- Device usage analysis
- Automatic fault notification
- Detailed report with diagnosis
- One-key device replacement
- OTA upgrade for future-proof

System Architecture

- Quick and easy trouble-shooting
- Internet-of-Things (IoT) featured
- Enables remote access/monitoring

- Europe based server & cloud
- Automatic report generation
- Data analysis & diagnosis

- Data transmission between Mesh network & Ethernet
- Support for wired and wireless connections to Ethernet
- Network real-time synchronization

True Presence/Absence Detection Technology

▶ In some applications such as office/meeting areas, users require a “true” presence motion detector. Traditional HF/PIR motion sensor cannot meet this requirement because the detection mechanism requires objects to move around to trigger, which is not favorable when people need to stand/sit statically for a period. There have been some so-called presence detection HF/PIR sensors in the market, but these so-called HF/PIR presence detection sensors are not “true” presence detectors, as these sensors detection mechanism is still based on minor-movements. When the person hardly moves the lights will turn off again after time-out, and in this case the person will need to move intentionally to keep refreshing the hold-time delay to avoid light suddenly switching off.

▶ Hytronik has been seeking for a “true” presence technology that aims to bring the best experience for users. And we are glad to announce that thanks to the strong R&D capabilities, Hytronik launched our “PRO” series HF motion sensors, loaded with the latest developed TRUE detection technology. Our True Presence Detection “PRO” series HF sensor works to detect human breathing. No matter if the person sit/stand statically or turns their back to the sensor. The “PRO” series can accurately recognize presence and keeps the lights on all the time.

▶ The “PRO” series are not only precisely accurate and sensitive, in the meanwhile the “PRO” series also behaves excellently in filtering interferences. Different kinds of false triggering sources in daily life (such as small animals, hidden waterpipes, tree leaf etc.) can be recognized and filtered by the sophisticated algorithm, with the aim of reducing false trigger chances as much as possible. Also, the “PRO” series are designed with robust antenna design which has strong resistance against all sorts of wireless interferences. 5G routers, GSM tower, RF etc. can all be coped with no trouble. The “PRO” series complies with latest RED standards.

DALI-2 Compliance

▶ Hytronik’s DALI-2 product portfolio includes HF/PIR motion sensor, LED driver, dimmer, touch panel etc. These DALI-2 products comply with IEC62386_101, 102, 103, 207, 209, 301, 303, 304... and Zhaga D4i. All Hytronik’s DALI-2 products are tested, and the test reports are listed on DIIA website.

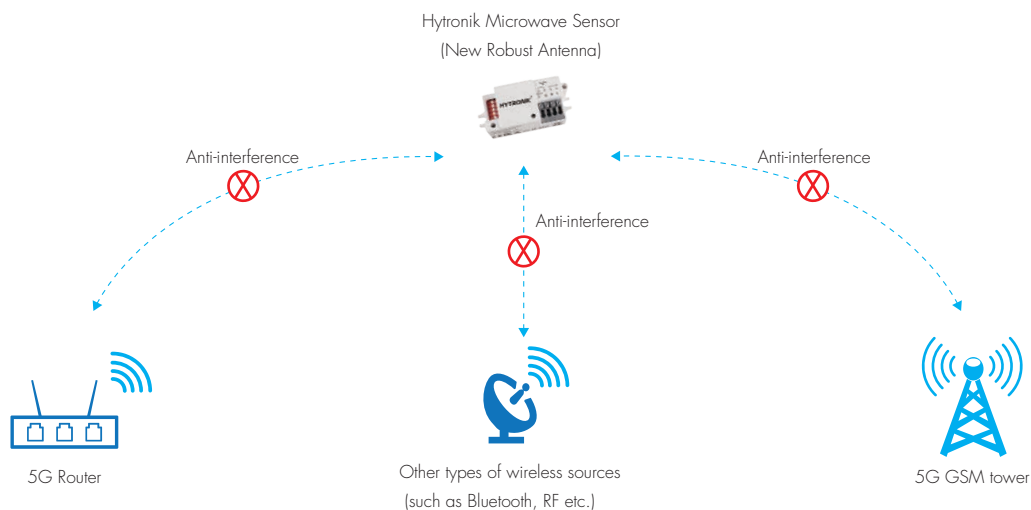

▶ Meanwhile, DALI-2 supports downward compatibility to old version DALI, so Hytronik’s DALI-2 products can also be used in previous/retrofit DALI projects as well.

Robust HF Sensors Design --- Anti-interference Technology

▶ Hytronik's microwave motion sensor uses 5.8GHz high frequency (HF) antenna in the product design. With the increasing density of wireless environments such as 5G GSM tower and 5G Wi-Fi coverage, this has created extra challenges for sensor's operation because the air is shared by all kinds of wireless signals, and transmissions from any device at the similar frequency could potentially cause interference. The effects of interference which can be noticed by users are usually false triggering of sensors (turning on/off erratically), or lights staying on even after hold time etc.

▶ To get around such tough environment, Hytronik has developed a new series of robust HF modules, designed to be loaded with our own special sophisticated software algorithms. These robust HF modules can withstand different types of wireless interferences in the real application. We believe this is the ultimate solution towards demanding installation environments in the future.

▶ Thanks to the improved resistance against wireless interference, the robust HF module is compliant to the latest RED standards.

▶ With this powerful antenna adapted in our microwave sensors, it ensures stable and accurate performance even when installed in tough wireless environments.

Photocell Advance™ (Pro-active Lux Switching & Pro-active Daylight Harvesting)

Background information: For built-in type motion sensor, for a long time lux control has been a headache for OEM manufactures, because the artificial light emitted by the luminaire itself can affect the photocell/photodiode measurement, and as a result the lux reading from photocell/photodiode can be very far away from the real ambient lux level (actually in most cases, the artificial light feedback from the luminaire itself is so strong that the photocell/photodiode reaches to a saturated/blinded status and cannot perform at all).

For the photocell to read ambient lux level normally, the common practice requires OEM designer to drill a hole on the luminaire so that the photocell/photodiode can be exposed outside to reduce the effect from the artificial light emitted by the luminaire itself. However, this practice can be very troublesome and limited in real applications, because it obviously compromises on the aesthetics of luminaire design, and at the same time demands OEM manufactures to have very good control over mass production and QC process. This is not easy in real life, costing great amount of time and money in the end. Hence, many OEM manufactures are forced to take **Passive Lux Switching** solution, and old technology which allows the photocell/photodiode to only measure ambient lux level when the fixture is in OFF status. If the fixture is ON then the photocell/photodiode does not make any lux measurements to prevent false reading.

Obviously this is not an ideal solution, an example would be that – From dawn to morning, if there is constant movement beneath the sensor then the sensor will stay on all the time and the photocell/photodiode simply does not have a chance to check the ambient lux level. Even if the sun rises and the real ambient lux level is way above the preset lux threshold value, the sensor has no chance to switch the light off. This will cause excessive energy waste, and the user experience is not friendly.

Aiming to solve this “headache” and maximize on the energy saving, previously Hytronik have developed a new solution called **Active Lux Switching** (or **24h Daylight Monitoring**), which is widely accepted and adopted by the industry. With such technology the photocell/photodiode can check ambient lux level on the moment the fixture transits from hold-time level into stand-by level, so that sensor can determine if the fixture goes to stand-by level or switches off. Also, during the stand-by level period the photocell/photodiode can still check ambient lux level at intervals, to determine if the fixture continues stand-by level or switches off.

Daylight
Monitoring

Based on Active Lux Switching technology, Hytronik proudly announces good news to the market and formally introduces a brand-new technology called **Photocell Advance™** (also as we call “**Pro-active Lux Switching**” technology). Thanks to the latest **Photocell Advance™** (or “**Pro-active Lux Switching**”) technology, Hytronik has become the leading standard in the lighting control industry by enabling intelligent light fixtures to achieve:

1

Photocell/Photodiode can work perfectly when **completely placed inside** luminaire cover, without needing to drill a hole on the luminaire cover.

**No extra components
No drilling required**

2

Dusk/Dawn Photocell – With the advanced **Pro-active Lux Switching** technology, Hytronik’s motion sensors are also able to achieve that luminaire be automatically switched on at dusk and be automatically switched off at dawn, even without movement triggering.

3

Daylight Prior to Motion – At any time, as long as the ambient lux level exceeds the preset lux threshold setting, Hytronik’s sensor will be able to switch off the luminaire even when the fixture is in ON status. During the whole process, the ambient lux measurement will not be affected by the artificial light emitted from the fixture itself.

4

Pro-active Daylight Harvesting – With the help of the powerful **Pro-active Lux Switching** technology, Hytronik has now made it possible for luminaires with built-in sensors to perform **Daylight Harvesting** (also widely referred to as “**Daylight Interaction**” or “**Daylight Regulation**”). Hytronik’s HF sensors and PIR sensors that are **Pro-active Daylight Harvesting** featured have been widely accepted by the leading OEM manufactures globally, and has become the industry standard typically in UK, Scandinavia Region, Dach region, Benelux region, and Australia.

Additionally, Hytronik’s Bluetooth App control has provided powerful tools to unlock potential functionalities surrounding the **Pro-active Daylight Harvesting** feature. One of it is called **Daylight Harvest Quick Setup** where a user is able to simply tick the checkbox to represent the luminaire’s location against the window position, so that the daylight harvest setup is easily done without any complicated commissioning (in the past, daylight harvesting is a very professional application meant for lighting specialists only and not quite accessible by public users). Hytronik has patented this **Daylight Harvest Quick Setup** App feature globally and has made daylight harvesting unprecedentedly intuitive and convenient.

Hytronik’s Patented App Feature: Daylight Harvest Quick Setup

Application Example ①: Corridor

- ✓ Dusk/Dawn Photocell
- ✓ Daylight Prior to Motion

Hold time: 10min;
Daylight Threshold: 50lux;
Standby Dimming Level: 10%;
Standby period: Infinity

At sunset, the **Dusk/Dawn Photocell** feature starts to work. When the ambient lux level is below the preset lux value, sensor will automatically turn on the light to dim level 10%, even if there is no movement around.

Between 17:30 to 19:00, when there is no movement around, light will stay at dim level 10% until people come at 19:00 and trigger the lights to 100% brightness level.

After 21:30, when all the people left, the sensor will automatically go back and stay at dim level 10% with the expiration of hold-time 10min.

In the early morning, the **Dusk/Dawn Photocell** feature starts to work again. When the ambient lux level becomes above the preset lux value, sensor will automatically switch off the light. Thanks to the **Daylight Prior to Motion** feature, even if there is constant movement around during the process, the sensor will switch off the light accurately without any trouble.

Application Example ②: Office

- ✓ Pro-active Daylight Harvesting
- ✓ Daylight Prior to Motion

Hold time: 30min;
Daylight Threshold: 300lux;
Standby Dimming Level: 10%;
Stand-by time: 30min

Before working hours, due to no movement around the light will stay off.

People starts to work. At this moment the ambient lux level is below the preset 300lux value, and movement will trigger the light on. The light will perform **Pro-active Daylight Harvesting**, so that the light will adjust its output according to the ambient lux level.

Between 8:30 to 12:00, there is constant movement in the office. Due to the **Pro-active Daylight Harvesting** feature the light output will gradually dim down, and the sensor will eventually switch the light off when the ambient lux level becomes above the preset lux value. Thanks to **Daylight Prior to Motion** feature, even if there is constant movement around during the process, the sensor will switch off the light accurately without any trouble.

Between 12:00 to 15:00, the ambient lux level is continuously above 300lux so the light will stay off all the time (even with people moving around), and the sensor will automatically switch the light on again when the ambient lux level drops below 300lux preset value. The light will perform **Pro-active Daylight Harvesting**, so that the light will adjust its output according to the ambient lux value.

Between 15:00 to 18:00, there is constant movement in the office. Due to the **Pro-active Daylight Harvesting** feature the light output will gradually dim up, and the sensor will eventually dim the light all the way up to 100% full brightness along with the decreasing ambient lux level.

At night, when there is completely no motion, the sensor will turn off the light after the expiration of hold-time and stand-by time.

Other Advanced Product Features

1. On/Off Control

These sensors provide simple switching of the light based upon occupancy. A daylight sensor is also built-in to prevent the light switching on when there is sufficient natural light.

With sufficient natural light, the light does not switch on when presence detected.

With insufficient natural light, the sensor switches on the light automatically when person enters the room.

The sensor switches off the light automatically after the hold-time when there is no motion detected.

2. Tri-level Control

Hytronik's tri-level dimming products offer 3 levels of light control: 100% → dimmed light → off, with settable time periods between each phase, as well as dimming level and daylight threshold.

*All Hytronik's tri-level dimming products can also be configured as **bi-level** control (by setting the stand-by period to infinity), so that the light always remains in the dimmed mode in absence for areas where there are safety, security or enhanced comfort requirements.

With sufficient natural light, the light does not switch on when presence detected.

With insufficient natural light, the sensor switches on the light automatically when person enters the room.

After hold-time, the light dims to stand-by level.

The light switches off automatically after the stand-by period elapsed.

3. Daylight Harvest

Right time, right place and the right amount of light! **Daylight harvest** (Also known as **daylight regulating** or **daylight interaction**) is a must in the future lighting norms. The daylight sensor measures the available surrounding natural light and calculates how much artificial light is needed to reach the target lux level. The control output is passed to the drivers by DALI or 0/1-10V signals which then deliver the needed amount of light.

Now with Photocell Advance™ technology, daylight harvest can be performed behind the cover!

The light will not switch on when natural light is sufficient, even with motion detected.

The light switches on automatically with presence when natural light is insufficient.

The light turns on at full or dims to maintain the lux level. The light output regulates according to the level of natural light available.

The light will be switched off when the ambient natural light is sufficient.

The light dims to stand-by brightness after hold-time and stays on the selected minimum dimming level.

The light switches off automatically after the stand-by period.

In the old days, to configure a daylight harvest application is not simple in real life, as it usually involves professional installers or lighting specialists with good lighting industry background and needs special equipment on site, which is not quite accessible by public users.

Aiming to simplify the daylight harvesting setup and make life easier for users, Hytronik has developed intuitive features that revolutionizes the commissioning processes --- Users can now easily commission daylight harvesting quickly and effortlessly!

Hytronik Special Feature 1:

Built-in type sensors and stand-alone sensors have different working logics when it comes to daylight harvesting. Built-in type motion sensors require "**open loop**" daylight harvesting to work properly, and stand-alone type motion sensors require "**closed loop**" daylight harvesting to work properly. Based on different product types, Hytronik has prepared the appropriate open loop/closed loop program before leaving factory so user does not need to worry about whether he should set up open loop or closed loop.

Open-loop

Closed-loop

Hytronik Special Feature 2:

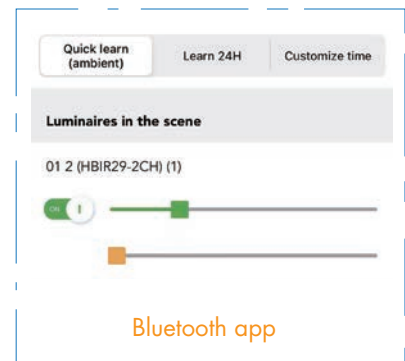

Hytronik sensor can **record** its **ambient** lux level as the new daylight harvesting target lux level. This is extremely useful because user can adjust the luminaire's output by himself until he found a comfortable/ideal lux value

on the table/ground, then the user can record this lux value via remote controller or Bluetooth app, so that the daylight harvest is done!

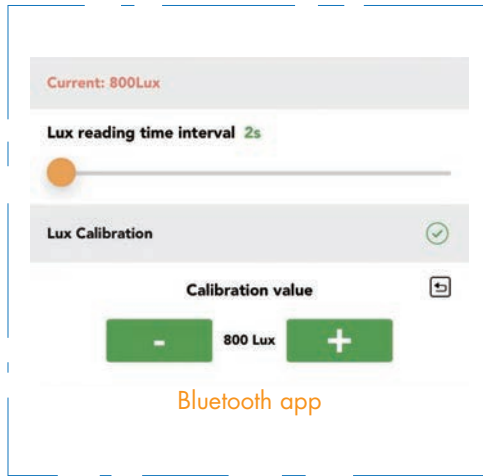

HRC-11

Remote Controller

Bluetooth app

Hytronik Special Feature 3:

The lux reading from sensor are based on the surrounding lux value around the physical location of the sensor product, rather than the lux value on the table/ground. However, in real applications, user's experience is based on the table/ground most of the time. To solve this problem, Hytronik provides **"calibration"** feature in the Bluetooth app. Before calibration, the target daylight harvest lux value reflects the lighting on ceiling level. But after the calibration, the target daylight harvest lux level will be close to the true experience on the table/ground level. This greatly enhances user experiences, while no complicated commissioning/knowledge will be needed – just done in the app with one touch on "calibration" button!

Hytronik Special Feature 4:

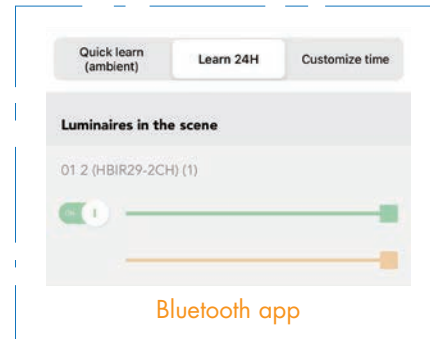

The daylight harvest lux value setup requires user to have a clear target in mind (for example, 500lux as target daylight harvest lux). But not all the users know what lux value should be set as target. To solve this problem, Hytronik provides two solutions to help with the setup.

a) "Daylight Harvest 24h Auto-config" feature:

Sometimes, user may find it difficult/troublesome to set daylight harvesting target lux level after installing a daylight harvest control sensor. This feature is on remote controller HRC-11 key button or Bluetooth app, where users can select different time period options (we suggest to select 24h), and once the sensor receives the learning command the sensor will keep the light constantly on during the entire period. After the period expires, the sensor will **automatically set the optimal target lux level** according to its installation location and ambient lux environment, and user does not need to do any operations during the process!

b) "Daylight Harvest Quick Setup" feature:

This is a Hytronik's patented feature in Bluetooth app, where a user is able to **simply tick the check box** to represent the luminaire's location against the window position, so that the daylight harvest is simply done without any complicated commissioning! This super intuitive user interface has made daylight harvesting unprecedentedly easy and convenient!

4. Synchronization Control

In many cases, several sensors are connected together to control the same fixtures. This requirement places extra demand on the reliability and noise handling capability of such sensors. Hytronik offers this feature with specially designed hardware & software to ignore such interferences and ensure stable operation.

Wired

1) High-voltage Sync Terminal

2) Connecting L' in Parallel

* For this type of usage, there are certain limitations. Please kindly check the precautions in advance with Hytronik team or on the website.

Wireless

1) Bluetooth Mesh Networking

Bluetooth 5.0 SIG mesh

2) RF 433MHz/868MHz FSK

5. RF (Primary & Secondary Control)

This is a combination of motion sensor and RF radio wave wireless transmission, which is a perfect solution for retrofit projects or in areas where wiring for controls is very limited, such as car parks. The motion detected by the transmitter unit can be passed onto other pre-defined receiver units through RF transmission. The RF signal can transmit up to 30 meters indoor and 100 meters in open areas.

1) Two styles of RF commissioning methods:

RF grouping (Rotary Switch Commissioning)

RF grouping (Teach and Learn Commissioning)

For smaller projects (up to 16 groups within the same transmission range) we offer a rotary switch group selector which allows commissioning by simply selecting the same number on all the units required to talk to each other.

For larger projects or where more flexibility is required, we employ a "teach and learn" system where commissioning is carried out by use of a remote-control handset. In this system the number of groups is not limited.

2) Typical Applications for Car Park:

With sufficient natural light, the sensor is not triggered by motion.

With insufficient natural light, the sensor is triggered by motion, the transmitter switches on the light and send RF signal to all salves.

After the hold-time, the whole group of lamps dim to pre-defined dimming level when no movement detected.

Application: HC018V/RF as transmitter and HC023RF / HC024RF as receiver; or SAM8 / SAM11/I with HC038V / HCD038 as transmitter, HC034RF as receiver.
Note: the lights go off directly after holdtime when controlled by HC023RF.

While the 1st sensor detects motion on the 1st floor, it switches the light on 100% and sends signal to all receiver units. All HC024RF on the 1st floor turn on 100% and the HC028V/RF on the 2nd floor goes to stand-by level.

The person walks to the 2nd floor, the 2nd HC028V/RF switches the light on 100%. All HC024RF on the 2nd floor turn the light on 100% and the HC028V/RF on the 3rd floor goes to stand-by level.

When walks to the 3rd floor, the 3rd HC028V/RF switches the light on 100%. All HC024RF on the 3rd floor turn the light on 100% and the HC028V/RF on the 4th floor goes to stand-by level. Meanwhile, the lights on the 1st floor are dimmed to stand-by level after hold-time.

The person walks to the 4th floor, the 4th HC028V/RF switches the light on 100%. All HC024RF on the 4th floor turn the light on 100% and the next HC028V/RF goes to stand-by level. Meanwhile, all sensors on the 1st floor turn the light off after stand-by period, and all lights on the 2nd floor dim to stand-by level after hold-time.

Application: HC028V/RF as both transmitter and receiver, HC023RF / HC024RF as receiver; or SAM8/ SAM11/I as both transmitter and receiver in the staircase, HC034RF as receiver in the corridor.

Note: the lights in the corridor go off directly after holdtime when controlled by HC023RF.

6. Circadian Rhythm Control (Human Centric Lighting)

Different from other complex lighting systems, Hytronik offers a simple de-centralized human centric lighting solution for offices, schools and hospitals with the tunable white feature. The solution is based on Bluetooth together with an intuitive and portable app, and does not require any complicated PC tools to set up and configure.

The controlled light output can enhance a user's day-to-day mood, wellbeing, productivity and attention levels. Users can simply choose our pre-programmed curves in the app, or create a new curve with color temperature (CCT) and brightness automatically changing according to the time of day.

7. One-key Commissioning

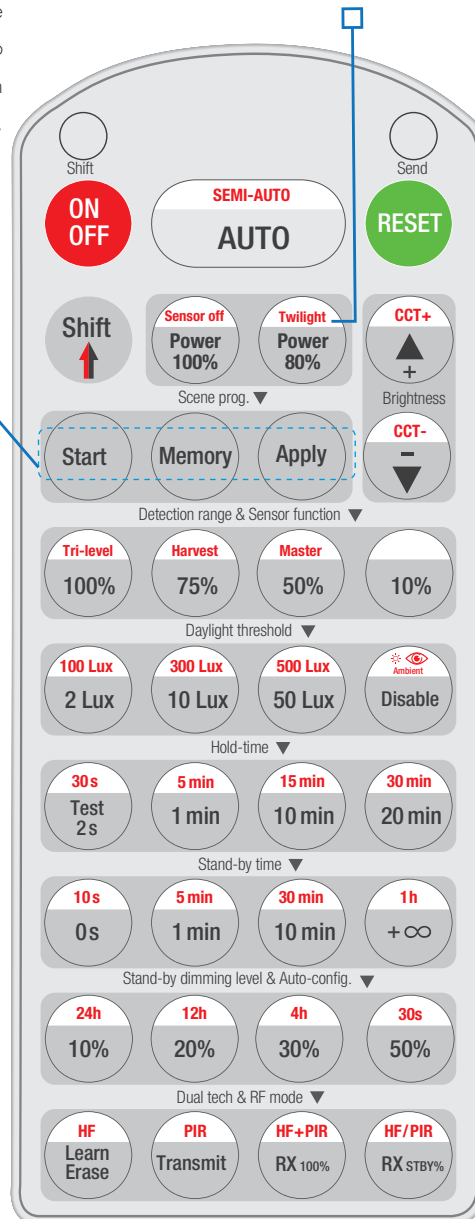

In real-life applications, most of the time all sensor parameters within a same area are needed to have identical sensor parameter setups, for example, same hold-time setp, same stand-by period setup, same daylight sensor setup etc. The use of one-key commissioning feature would save significant time and work for installer and prevent from having to do the same settings to every sensor one by one.

Press "Start" button on the remote controller HRC-11 to program, and then select one parameter setting from "Detection range", "Daylight threshold", "Hold-time", "Stand-by time", "Stand-by dimming level" and press "Memory" button to save this set of parameter settings programmed in the remote controller HRC-11. Then the user will only need to press button "Apply" to set the settings to each sensor unit(s). One-key commissioning is quick, simple, user-friendly, and flexible!

8. Twi-light Mode

There are occasions when the application does not require motion sensor detection and just wants the motion sensor to act as a daylight sensor only. Twi-light is the right feature to serve for such purposes! A press on the "Twi-light" button on the remote controller HRC-11 would disable the motion sensor function, while the function of the photocell is still working and able to perform dusk/dawn switching & daylight harvesting (where applicable).

HRC-11

9. Semi-auto Mode (Absence Detection)

It is easy to forget to switch off the light, in office, corridor, even at home. And in many other cases, people do not want to have a sensor to switch on the light automatically, for example, when people just quickly pass-by, there is no need to have the light on. The solution is to apply this "absence detector": motion sensor is employed, but only activated on the manual press of the push switch, the light keeps being ON in the presence, and dims down in the absence, and eventually switches off in the long absence.

This is a good combination of sensor automation and manual override control, to have the maximum energy saving, and at the same time, to keep efficient and comfortable lighting.

The light does not switch on when there is presence being detected.

Short push to activate the sensor and switch on the light

The light turns on full, and the sensor stays in sensor mode.

The light keeps being ON during the presence.

People left, the light dims to stand-by level after the hold-time.

The light switches off automatically after the stand-by period elapses.

Manual Override:

The sensor reserves the access of manual override function for end-user to switch on/off, or adjust the target lux level by push-switch, which makes the product more user-friendly and offers more options to fit some extra-ordinary demands:

* Short Push (<1s): on/off function;

On → Off: the light turns off immediately and cannot be triggered ON by motion until the expiration of pre-set hold-time. After this period, the sensor goes back to normal sensor mode.

Off → On: the light turns on and goes to sensor mode, no matter if ambient Lux level exceeds the daylight threshold or not.

* Long Push (>1s): adjust the target lux level by turning the light up or down. Both the adjustment on App/RC and push switch can overwrite each other, the last adjustment remains in memory.

Note: if end-user do not want this manual override function, just leave the "push" terminal unconnected to any wire.

Note: end-user can choose either absence detection (semi-auto mode) or manual override for application. Default function is manual override.

10. Dual-Sense™ Technology

Microwave (HF) and PIR are the most commonly adapted detection technologies in the lighting control industry. However both detection technologies have their own advantages and disadvantages.

The aim of Hytronik's Dual-Sense™ technology is to make use of the advantages and bypass the disadvantages.

Advantages:

- * Sensitive to minor motion;
- * Does not require any drillings on the fixture;
- * Can be reflected by objects and hence covering big detection area;
- * Resilient to heat source, smoke and air conditioner.

Disadvantages:

- * Penetrate walls, pick up motions outside of the office area;
- * Back wave detection, false trigger by motion from ceiling behind;
- * Can be false triggered by ventilation fans, elevators etc. in industrial application.

Advantages:

- * No penetration, confined detection area;
- * Sensitive to tangential movement;
- * Resilient to motion object which has no heat radiation.

Disadvantages:

- * Can be false triggered by air conditioner, smoke and other types of heat sources;
- * The performance is highly dependent on ambient temperature and different seasons.

Dual-Sense™ technology combines both HF and PIR together, which provides 4 optional detection modes via DIP switch or remote controller:

- 1) HF only
- 2) PIR only
- 3) Either HF or PIR – When either detector is triggered, the motion is considered valid and the light will turn on. This is for maximizing the detection capability.
- 4) Both HF & PIR – Only when both detectors are triggered, the motion is considered valid and the light will turn on. This is for maximizing the detection accuracy and decreasing the detection capability to prevent the sensor from false trigger by heat source, air conditioner, ventilation fans, elevators etc.

This **Dual-Sense™** technology gives installers the flexibility to adjust the sensor on the project, an easy way to trouble shoot onsite. Dual-sense is the ultimate and powerful solution to meet every practical need in real life.

11. Highlight Firmware Features

Zero-cross Relay Operation

Our intelligent software design means our sensors switch the load right at the zero-cross point to minimise inrush current passing through the relay contact point. This enables the maximum load and life-time of the relay to be achieved.

Memory Against Loss of Power

Even if there is unexpected power failure, all the sensor's parameter settings are still memorized inside the chip. When DIP switches and remote controller are used at the same time. The chip remembers the last setting before the loss of power.

Soft-on & Soft-off

Hard on/off switching of the light can be uncomfortable to the eyes. Our built-in soft-on & soft-off feature offers easy-on-the-eye operation of the light fixtures and gives a more elegant feel to the lit environment normally associated with high-end lighting controls. Soft-on & Soft-off also gives less damages to LED driver and help to expand the LED driver's lifespan.

Typical Recommended Applications

Component selection is part of the skill and creativity of the luminaire design engineer, however the illustrations below serve as a guide to the typical applications to which the featured product may be suited, and appear next to relevant products through this brochure.

LED Panels or 'Troffers'

Recessed luminaires for false ceilings typically require control gear products with insulated terminals and cord restraint for safe installation in the ceiling void. Antenna integrations are possible, but usually require comprise with complicated assembly. Hytronik offer discrete flush mount sensors which can be neatly and easily situated next to the luminaire. Further information on our suited product ranges can be found on our website or stand-alone brochure.

Utility Luminaires or Bulkheads

These products usually have restricted space and/or demanding thermal requirements. There are usually also many variants to cover in a given product range whilst trying to remain within a competitive budget. Hytronik serves this customer base and many clients already benefit from our integrated control gear, occupancy sensing and daylight sensing solutions.

Pendant

Linear Fixtures

Tri-proof Fixtures

This style represents a wide range of luminaire styles from vapor proof/tri-rated/IP-65 style to utility low-bay batten fixtures and high end architectural suspended fixtures. In terms of control gear the requirements and demands are similar: low profile and thermally robust.

High Power Flood Lights & High Bay Fixtures

These fixtures usually demand a long range sensor in a small space or a means of external mount in an IP54/65 rated package. This brochure covers sensors meant for internal mounting and IP20 'bolt-on' style. For sensors which are IP54/IP65 rated and suitable for externally mounting to the fixture, please refer to our website or stand-alone brochure.

Industrial Lighting

Industrial applications include: warehouse, equipment plant, factory plant etc.

Industrial luminaires mounting infrastructure and wiring limitations demand sensors with innovative and flexible mounting options. Hytronik's solutions provide the designer with freedom to select and implement lighting controls in the most convenient and cost effective manner.

Commercial Lighting

Commercial applications include: car park, hospital, healthcare center, school, shops, hotel, office, meeting room, staircase, corridor etc.

Commercial luminaires present interesting engineering challenges when adding occupancy and lighting controls, with wiring restrictions usually constricting the budgets to provide a reasonable solution. Hytronik's range of sensor selections provide the perfect solution for cost effective functionality and accuracy.

Domestic Lighting

Domestic applications include: residential areas such as private apartment, private house etc.

Great things come in small packages, and the Hytronik's dimmer series is no exception. Whether used for new build, retrofit projects or for lighting manufactures to add intelligent control to standard lighting fixtures. With the synergy of Bluetooth mesh technology and gateway & app support, our extremely versatile range of products does it all!

Retrofit Upgrade

Hytronik offers an extended range of products to cater for upgrading existing installations. Simple retrofit devices for instant energy savings to advanced controls utilizing daylight offering enhanced comfort and further energy savings, there is a product to suit every budget.

Furthermore, Hytronik's Bluetooth series and RF series products have significantly reduced the labor costs for wiring thanks to the wireless grouping technology.

NEW! HC005SBT/PRO

Technical Data & Specifications

- Input: 220-240VAC 50/60Hz
- Output (Max Loading): 300VA capacitive / 400W resistive
- Warming-up period: 20s
- Microwave detection (HF 5.8GHz \pm 75MHz)
- Max withstandable in-rush current: 80A@160 μ s
- Ta: -20°C ~ +50°C; Tc: +75°C

Suitable for

Features & Functions

- True presence detection technology (*See pg. 12)
- **Bluetooth**® 5.0 SIG Mesh (*See full details on pg. 05-11)
- On/Off control with relay output
- Robust HF antenna design against wireless interference (*See pg. 13)
- Daylight sensor: Photocell Advance™ (*See pg. 14-17)
- Pro-active Lux Switching technology (*See pg. 16)
- Max installation height: 3m
- Max detection range: \varnothing = 8m (diameter)
- Max true presence detection range: \varnothing = 8m (diameter)
- Size: L * W * H = 102mm * 45mm * 28mm
- Sensor settings via mobile/tablet app & PC web platform
- Optional horizontal / vertical screw mount orientation (horizontal as default)

- Input: 220-240VAC 50/60Hz
- Output (Max Loading): 400VA capacitive / 1200W resistive
- Warming-up period: 20s
- Max withstandable in-rush current: 80A@160µs
- Ta: -35°C ~ +70°C; Tc: +80°C

Suitable for

Features & Functions

- 1-10V dimming control with relay output
- Tri-level dimming (*See pg. 19)
- RF receiver
- RF frequency options: FSK433MHz/FSK868MHz
- Daylight sensor: NA
- Size: L * W * H = 87mm * 37.5mm * 38.3mm
- Receiver settings via DIP-Switches
- Rotary Switch for quick RF channel pair (*See pg. 22-23)

HC428V/RF

Technical Data & Specifications

- Input: 120-277VAC 50/60Hz
- Output (Max Loading): 500VA
- Warming-up period: 20s
- Microwave detection (HF 5.8GHz ± 75MHz)
- Max withstandable in-rush current: 80A@160µs
- Ta: -35°C ~ +70°C; Tc: +80°C

Suitable for

Features & Functions

- 1-10V dimming control with relay output
- Tri-level dimming (*See pg. 19)
- RF transceiver
- RF frequency options: FSK915MHz
- Daylight sensor: Photodiode (PD)
- Active Lux Switching technology (*See pg. 15)
- Max installation height: 6m
- Max detection range: Ø = 10m (diameter)
- Size: L * W * H = 114.5mm * 54mm * 27.5mm
- Sensor settings via DIP-Switches
- Rotary Switch for quick RF channel pair (*See pg. 22-23)
- Switch-Dim (PUSH) terminal

HC423RF

Technical Data & Specifications

- Input: 120-277VAC 50/60Hz
- Output (Max Loading): 500VA
- Warming-up period: 20s
- Max withstandable in-rush current: 80A@160µs
- Ta: -35°C ~ +70°C; Tc: +80°C

Suitable for

Features & Functions

- On/Off control with relay output
- RF receiver
- RF frequency options: FSK915MHz
- Daylight sensor: NA
- Size: L * W * H = 82mm * 38mm * 38.3mm
- Rotary Switch for quick RF channel pair (*See pg. 22-23)

HC424RF

Technical Data & Specifications

- Input: 120-277VAC 50/60Hz
- Output (Max Loading): 500VA
- Warming-up period: 20s
- Max withstandable in-rush current: 80A@160µs
- Ta: -35°C ~ +70°C; Tc: +80°C

Suitable for

Features & Functions

- 1-10V dimming control with relay output
- Tri-level dimming (*See pg. 19)
- RF receiver
- RF frequency options: FSK915MHz
- Daylight sensor: NA
- Size: L * W * H = 87mm * 37.5mm * 38.3mm

What is the concept behind Hytronik's detachable sensor design ?

Hytronik's detachable control base + sensor head design aims to provide maximum space-saving and flexibility for different types of luminaire design. The super-mini sensor head options integrate motion sensor and daylight sensor together, with our latest advanced technologies. These versatile sensor head options range from HF to PIR, from remote control to Bluetooth mesh network, from on/off control to dimmable control, from low-bay to high-bay, from IP20 to IP65....Small, yet mighty!

Based on different usages, we have divided our sensor heads into 6 categories for better understanding:

Sensor Head Options - - - Category A ▶▶▶

- Non-Bluetooth featured
- Sensor settings via remote controller
- Dimming control (0/1-10V or DALI)
- Control bases options: HC038V, HCD038, HC438V, HCD438, HCD038/P

Sensor Head Options - - - Category B ▶▶▶

- Bluetooth featured (Bluetooth module in sensor head, ideal for metal luminaires)
- Sensor settings via mobile/tablet app & web app platform
- Dimming control (0/1-10V or DALI)
- Control bases options: HC038V, HCD038, HC438V, HCD438, HCD038/P

Sensor Head Options - - - Category C ▶▶▶

- Bluetooth featured (Bluetooth module in control base, ideal for plastic luminaires)
- Sensor settings via mobile/tablet app & web app platform
- Dimming control (0/1-10V or DALI-2)
- Control bases options: HC038V/BT, HCD038/BT, HC438V/BT, HCD438/BT, HCD038/CA, HCD438/CA

Sensor Head Options - - - Category D ▶▶▶

- Non-Bluetooth featured
- Sensor settings via remote controller, or via dip-switches on sensor head
- Non-dimming control (On/Off only)
- Control bases options: HC038, HC438

Sensor Head Options - - - Category E ▶▶▶

- Non-Bluetooth featured
- Sensor settings via remote controller, or via dip-switches on control base
- On/Off or 1-10V dimming control
- Control bases options: HC009S-KD, HC009S-KD/I, HC403V-KD, HC403VRC-KD, HC403VRC-KD/I, HC603VRC-KD

Sensor Head Options - - - Category F ▶▶▶

- Sensor head only, ready to be integrated into a third-party LED driver
- PWM or 0-10V output
- Comes with Bluetooth & Non-Bluetooth options
- No control base needed

Sensor Head Options --- Category A ▶▶▶

- Non-Bluetooth featured
- Sensor settings via remote controller
- Dimmable control (0/1-10V or DALI/DALI-2)
- Control base options: HC038V, HCD038, HC438V, HCD438, HCD038/P

* Only when both HCD038/P and DALI-2 marked sensor head are used together, then the combination is DALI-2 enabled as a whole. The DALI-2 enabled sensors can freely switch between tri-level control and daylight harvest through remote controller HRC-11 settings.

- 220V-240VAC input
- DALI-2 output with 80mA power supply built-in
- Compliant to IEC62386_101, 103, 303, 304, 351
- Size: L * W * H = 120mm * 30mm * 21mm
- 2 Switch-Dim (PUSH) terminals

- 220V-240VAC input
- DALI output with 30mA power supply built-in
- Size: L * W * H = 120mm * 30mm * 21mm
- Switch-Dim (PUSH) terminal

- 120V-277VAC input
- DALI output with 30mA power supply built-in
- Size: L * W * H = 120mm * 30mm * 21mm
- Switch-Dim (PUSH) terminal

- 220V-240VAC input
- 1-10V dimming control with relay output
- Max loading: 400VA capacitive / 800W resistive
- Size: L * W * H = 120mm * 30mm * 21mm
- Switch-Dim (PUSH) terminal

- 120V-277VAC input
- 1-10V dimming control with relay output
- Max loading: 400VA capacitive / 800W resistive
- Size: L * W * H = 120mm * 30mm * 21mm
- Switch-Dim (PUSH) terminal

Sensor Head Options --- Category B

- Bluetooth featured (Bluetooth module in sensor head, ideal for metal luminaires)
- Sensor settings via mobile/tablet app & web app platform
- Dimmable control (0/1-10V or DALI/DALI-2)
- Control base options: HC038V, HCD038, HC438V, HCD438, HCD038/P

* Full Bluetooth features can be seen on page 04

* Any of these DALI-2 marked sensor heads needs to be used together with HCD038/P to achieve DALI-2 as a whole.

- 220V-240VAC input
- DALI-2 output with 80mA power supply built-in
- Compliant to IEC62386_101, 103, 303, 304, 351
- Size: L * W * H = 120mm * 30mm * 21mm
- 2 Switch-Dim (PUSH) terminals

- 220V-240VAC input
- DALI output with 30mA power supply built-in
- Size: L * W * H = 120mm * 30mm * 21mm

Sensor Head Options --- Category C

- Bluetooth featured (Bluetooth module in control base, ideal for plastic luminaires)
- Sensor settings via mobile/tablet app & web app platform
- Dimmable control (0/1-10V or DALI-2)
- Control bases options: HCO38V/BT, HCD038/BT, HC438V/BT, HCD438/BT, HCD038/CA, HCD438/CA

* Full Bluetooth features can be seen on page 04

* When any one of these sensor heads is used with HCD038/BT or HCD438/BT, then the combination is DALI-2 enabled as a whole.

* Pro-active Lux Switching (Photocell Advance™) feature will not be available when using with HCD038/CA, HCD438/CA.

Features & Functions

- True presence detection technology (*See pg. 12)
- **Bluetooth®** 5.0 SIG Mesh (*See full details on pg. 05-11)
- On/Off control with relay output
- Robust HF antenna design against wireless interference (*See pg. 13)
- Daylight sensor: Photodiode (PD)
- Active Lux Switching technology (*See pg. 15)
- Presence mode / Absence mode (Auto / Semi-auto) (*See pg. 26)
- Max installation height: 3m
- Max detection range: Ø =8m (diameter)
- Max true presence detection range: Ø =8m (diameter)
- Sensor settings via mobile/tablet app & PC web platform
- Switch-Dim (PUSH) terminal
- Optional IP20/IP65 ceiling mount box accessory HA03
- Tool-free installation: removable terminal blocks and clips

Technical Data & Specifications

- Input: 220-240VAC 50/60Hz
- Output (Max Loading): 800VA capacitive / 1200W resistive
- Warming-up period: 20s
- Microwave detection (HF 5.8GHz ± 75MHz)
- Max withstandable in-rush current: 120A@160µs

Blind option 1
(Aisle detection)Blind option 2
(180° detection)

Features & Functions

- Silvar Bluetooth® module built-in
- DALI broadcast with power supply unit built-in
- Tri-level dimming & Daylight harvest (*See pg. 19-21)
- Support DT8 drivers with tunable white control
- Daylight sensor: Photocell
- Active Lux Switching technology (*See pg. 15)
- Sensor settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals
- Optional IP20/IP65 ceiling mount box accessory HA03
- Optional blind insert / blanking plate accessory (Not applicable on HBR29/SV/RH)
- Tool-free installation: removable terminal blocks and clips

Technical Data & Specifications

- Input: 220-240VAC 50/60Hz
- Output (Max Loading): 80mA DALI power supply
- Warming-up period: 20s
- Passive infrared (PIR) detection
- Ta: -20°C ~ +50°C

- Sensor settings via handset HRC-11
- Switch-Dim (PUSH) terminal
- Optional IP20/IP65 ceiling mount box accessory HA02
- Optional blind insert / blanking plate accessory

Technical Data & Specifications

- Input: 220-240VAC 50/60Hz
- Output (Max Loading): 800VA capacitive / 1600W resistive
- Warming-up period: 20s
- Passive infrared (PIR) detection
- Max withstandable in-rush current: 120A@160 μ s
- Ta: -20°C ~ +50°C

Suitable for

HIR22

HRC-11

Optional: Surface Mount Box (IP20/IP65)

HA02: Default IP20;
IP65 is optional upon request

Optional: Blind Insert/Blanking Plate

Blind option 1
(Aisle detection)

Blind option 2
(180° detection)

Features & Functions

- 1-10V dimming control with relay output
- Daylight harvest (*See pg. 19-21)
- Daylight sensor: Photocell
- Active Lux Switching technology (*See pg. 15)
- Presence mode / Absence mode (Auto / Semi-auto) (*See pg. 26)
- Rotary Switch for scene selection / fast programming
- Max installation height: 6m
- Max detection range: $\varnothing = 10\text{m}$ (diameter)
- Sensor settings via handset HRC-11
- Switch-Dim (PUSH) terminal
- Optional IP20/IP65 ceiling mount box accessory HA02
- Optional blind insert / blanking plate accessory

Technical Data & Specifications

- Input: 220-240VAC 50/60Hz
- Output (Max Loading): 800VA capacitive / 1600W resistive
- Warming-up period: 20s
- Passive infrared (PIR) detection
- Max withstandable in-rush current: 120A@160 μ s
- Ta: -20°C ~ +50°C

Suitable for

HCD049

Features & Functions

- DALI/DALI-2 with power supply unit built-in
- Compliant to IEC62386_101, 103, 351
- Tri-level dimming & Daylight harvest (*See pg. 19-21)
- Support DT8 drivers with tunable white control
- Batten-fit / Bolton mount style
- Daylight sensor: Photocell
- Active Lux Switching technology (*See pg. 15)
- Max installation height: 1.5m (forklift) / 12m (human)
- Max detection range: $\varnothing = 24\text{m}$ (forklift) / 20m (human)
- Conduit thread: M20 * 1.5mm
- Sensor settings via handset HRC-11
- IP65 rated

Technical Data & Specifications

- Input: 220-240VAC 50/60Hz
- Output (Max Loading):
30mA DALI power supply
- Warming-up period: 20s
- Passive infrared (PIR) detection
- Ta: -20°C ~ +50°C

Suitable for

HC049S

Features & Functions

- On/Off control with relay output
- Batten-fit / Bolton mount style
- Daylight sensor: Photodiode (PD)
- Active Lux Switching technology (*See pg. 15)
- Max installation height: 1.5m (forklift) / 12m (human)
- Max detection range: $\varnothing = 24\text{m}$ (forklift) / 20m (human)
- Conduit thread: M20 * 1.5mm
- Sensor settings via handset HRC-11
- IP65 rated

Technical Data & Specifications

- Input: 220-240VAC 50/60Hz
- Output (Max Loading): 400VA capacitive / 800W resistive
- Warming-up period: 20s
- Passive infrared (PIR) detection
- Max withstandable in-rush current: 80A@160μs
- Ta: -20°C ~ +50°C

Suitable for

HMW11

Features & Functions

- 1-10V dimming control with relay output
- Tri-level dimming (*See pg. 19)
- 3 installation styles: surface-mount / flush-mount / junction box mount
- Daylight sensor: Photodiode (PD)
- Active Lux Switching technology (*See pg. 15)
- Presence mode / Absence mode (Auto / Semi-auto) (*See pg. 26)
- Rotary switch for scene selection / fast programming
- Max installation height: 15m (forklift) / 12m (human)
- Max detection range: $\varnothing = 26m$ (forklift) / 18m (human)
- Sensor settings via handset HRC-11
- Switch-Dim (PUSH) terminal
- Optional flush mount box accessory HA06

Technical Data & Specifications

- Input: 220-240VAC 50/60Hz
- Output (Max Loading): 800VA capacitive / 1600W resistive
- Warming-up period: 20s
- Microwave detection (HF 5.8GHz \pm 75MHz)
- Max withstandable in-rush current: 120A@160 μ s
- Ta: -20°C ~ +50°C

Suitable for

HMW12

Features & Functions

- 1-10V dimming control with relay output
- Daylight harvest (*See pg. 19-21)
- 3 installation styles: surface-mount / flush-mount / junction box mount
- Daylight sensor: Photodiode (PD)
- Active Lux Switching technology (*See pg. 15)
- Presence mode / Absence mode (Auto / Semi-auto) (*See pg. 26)
- Rotary switch for scene selection / fast programming

- Max detection range: $\varnothing = 26\text{m}$ (forklift) / 18m (human)
- Sensor settings via handset HRC-11
- Switch-Dim (PUSH) & Sync terminal
- Optional flush mount box accessory HA06

Technical Data & Specifications

- Input: 220-240VAC 50/60Hz
- Output (Max Loading): 40mA DALI power supply
- Warming-up period: 20s
- Microwave detection (HF 5.8GHz \pm 75MHz)
- Ta: -20°C ~ +50°C

Suitable for

HMW15

A: Surface-mount Version

B: Flush-mount Version

Features & Functions

- On/Off control with relay output
- 3 installation styles: Surface-mount / Conduit / Clamp
- Four detection modes: HF only / PIR only / HF or PIR / HF and PIR
- Daylight sensor: Photodiode (PD)
- Active Lux Switching technology (*See pg. 15)
- Rotary Switch for quick RF channel pair (*See pg. 22-23)
- Max installation height: 1.5m (forklift) / 12m (human)
- Max detection range: HF: $\varnothing = 26\text{m}$ (forklift) / 16m (human)
PIR: $\varnothing = 24\text{m}$ (forklift) / 20m (human)
- Sensor settings via handset HRC-11
- IP65 rated
- 3 Optional lens cover to choose from with different detection patterns

Technical Data & Specifications

- Input: 220-240VAC 50/60Hz
- Output (Max Loading): 800VA capacitive / 1000W resistive
- Warming-up period: 20s
- Dual-sense™: microwave + passive infrared (HF + PIR) detection (*See pg. 27)
- Max withstandable in-rush current: 120A@160 μ s

Technical Data & Specifications

- Input: 120-277VAC 50/60Hz
- Output (Max Loading): 1000VA/2000W
- Warming-up period: 20s
- Microwave detection (HF 5.8GHz \pm 75MHz)
- Max withstandable in-rush current: 120A@160 μ s
- Ta: -20°C ~ +50°C

Suitable for

HC402S/T

Features & Functions

- On/Off control with relay output
- Daylight sensor: Photodiode (PD)
- Support to be connected to a triac dimmer's output, so that it achieves 10-100% dimming control
- Max installation height: 6m
- Max detection range: $\varnothing = 12\text{m}$ (diameter)
- Sensor settings via DIP-Switches

Technical Data & Specifications

- Input: 120-277VAC 50/60Hz
- Output (Max Loading): 400VA capacitive / 1200W resistive
- Warming-up period: 20s
- Microwave detection (HF 5.8GHz \pm 75MHz)

Features & Functions

- DALI broadcast with power supply unit built-in
- 1-10V dimming control with relay output
- Daylight harvest (*See pg. 19-21)
- Daylight sensor: Photocell
- Active Lux Switching technology
- Type of relay: Total 3 relays, one for VFC, two for 0/1-10V & Switched L
- Max installation height: 25m (forklift) / 20m (human)
- Max detection range: 40m (wall mounted)
- Sensor settings via handset HRC-05
- IP65 rated

Technical Data & Specifications

- Input: 220-240VAC 50/60Hz
- Output (Max Loading):
DALI-2: 40mA DALI power supply
1-10V & On/Off: 2x800VA capacitive / 2x1000W resistive
Volt-free: $\leq 48\text{VDC}(\leq 2\text{A})$; $\leq 240\text{VAC}(\leq 3.6\text{A})$
- Warming-up period: 20s

NEW!

HED1009/BT

Suitable for

- **Bluetooth®** 5.0 SIG Mesh (*See full details on pg. 05-11)
- Constant Current (CC)
- Size: L * W * H = 120mm * 30mm * 21mm
- Input: 220V-240VAC, 50/60Hz
- Max power: 9W
- Dimmable (via Bluetooth & Switch-Dim)
- Multiple current selection via DIP-Switches
- Mobile/tablet app & PC web platform control
- 2 Switch-Dim (PUSH) terminals
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage range:
1-6W/ 200mA /6-30V, 1.5-7.5W/ 250mA /6-30V
2-9W/ 300mA /6-30V, 2-9W/ 350mA /6-25V
2.5-9W/ 400mA /6-22V, 3-9W/ 500mA /6-18V
3.5-9W/ 600mA /6-15V

NEW!

HED6010/BT

Suitable for

- **Bluetooth®** 5.0 SIG Mesh (*See full details on pg. 05-11)
- Constant Current (CC)
- Size: L * W * H = 150mm * 52mm * 28mm
- Input: 220V-240VAC, 50/60Hz
- Max power: 12.5W
- Dimmable (via Bluetooth & Switch-Dim)
- Multiple current selection via DIP-Switches
- Mobile/tablet app & PC web platform control
- 2 Switch-Dim (PUSH) terminals
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage range:
1.5-8W/ 195mA /6-41V, 1.5-9W/ 230mA /6-41V
1.5-10W/ 250mA /6-41V, 2-12W/ 300mA /6-41V
2.5-12.8W/ 350mA /6-36V, 2.5-12.8W/ 400mA /6-32V
3-12.5W/ 500mA /6-25V

NEW!

HED1025/BT

Suitable for

- **Bluetooth®** 5.0 SIG Mesh (*See full details on pg. 05-11)
- Constant Current (CC)
- Size: L * W * H = 245mm * 25.5mm * 21mm
- Input: 220V-240VAC, 50/60Hz
- Max power: 25W
- Dimmable (via Bluetooth & Switch-Dim)
- Multiple current selection via DIP-Switches
- Mobile/tablet app & PC web platform control
- 2 Switch-Dim (PUSH) terminals
- Max. Output Power/Current/Voltage range:
3-15W/ 300mA /10-50V, 3.5-17W/ 350mA /15-50V
4-20W/ 400mA /10-50V, 4.5-22W/ 450mA /10-48V
5-24W/ 500mA /10-48V, 5.5-24W/ 550mA /10-44V
6-25W/ 600mA /10-42V, 6.5-25W/ 650mA /10-38V
7-25W/ 700mA /10-36V

NEW!

HBE9028/KD

Suitable for

- **Bluetooth®** 5.0 SIG Mesh (*See full details on pg. 05-11)
- Constant Current (CC)
- Size: Ø * H = 130.1mm * 28mm
- Input: 220V-240VAC, 50/60Hz
- Max power: 28W
- Dimmable (via Bluetooth & Switch-Dim)
- Multiple current selection via DIP-Switches
- Mobile/tablet app & PC web platform control
- Switch-Dim (PUSH) terminal
- Optional motion sensor pluggable (Sensor-Dim)
- See category C for all HF & PIR sensor head options (*See pg. 88)
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage range:
13-28W/ 865mA /15-33V

NEW!

HED7030/BT

Suitable for

- **Bluetooth® 5.0 SIG Mesh** (*See full details on pg. 05-11)
- Constant Current (CC)
- Size: L * W * H = 108mm * 69mm * 22.2mm
- Input: 220V-240VAC, 50/60Hz
- Max power: 30W
- Dimmable (via Bluetooth & Switch-Dim)
- Multiple current selection via DIP-Switches
- Mobile/tablet app & PC web platform control
- 2 Switch-Dim (PUSH) terminals
- Optional motion sensor pluggable (Sensor-Dim)
- See category C for all HF & PIR sensor head options (*See pg. 88)
- Max. Output Power/Current/Voltage range:
3.5-20W/ 350mA /10-57V, 5-29W/ 500mA /10-57V
5.5-30W/ 550mA /10-55V, 7-30W/ 700mA /10-43V
7.5-30W/ 750mA /10-40V, 9-23W/ 900mA /10-25V

NEW!

HED1040/BT

Suitable for

- **Bluetooth® 5.0 SIG Mesh** (*See full details on pg. 05-11)
- Constant Current (CC)
- Size: L * W * H = 330mm * 32mm * 27mm
- Input: 220V-240VAC, 50/60Hz
- Max power: 40W
- Dimmable (via Bluetooth & Switch-Dim)
- Multiple current selection via DIP-Switches
- Mobile/tablet app & PC web platform control
- 2 Switch-Dim (PUSH) terminals
- Max. Output Power/Current/Voltage range:
2-18W/ 350mA /6-50V, 2-20W/ 400mA /6-50V
2-23W/ 450mA /6-50V, 3-25W/ 500mA /6-50V
3-28W/ 550mA /6-50V, 3-30W/ 600mA /6-50V
4-33W/ 650mA /6-50V, 4-35W/ 700mA /6-50V
4-38W/750mA /6-50V, 5-40W/ 800mA /6-50V
5-40W/ 850mA /6-47V, 5-38W/ 900mA /6-42V

NEW!

HED6045/BT

Suitable for

- **Bluetooth® 5.0 SIG Mesh** (*See full details on pg. 05-11)
- Constant Current (CC)
- Size: L * W * H = 140.6mm * 79.2mm * 23mm
- Input: 220V-240VAC, 50/60Hz
- Max power: 45W
- Dimmable (via Bluetooth & Switch-Dim)
- Multiple current selection via DIP-Switches
- Mobile/tablet app & PC web platform control
- 2 Switch-Dim (PUSH) terminals
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage range:
3.5-19W/ 350mA /10-54V, 5-27W/ 500mA /10-54V
6-32W/ 600mA /10-54V, 7-38W/ 700mA /10-54V
8-42W/ 800mA /10-52V, 9-45W/ 900mA /10-50V
9.5-45W/950mA /10-47V, 10-45W/1000mA /10-45V
10.5-44W/1050mA /10-42V

NEW!

HED8025/BT

Suitable for

- **Bluetooth® 5.0 SIG Mesh** (*See full details on pg. 05-11)
- Constant Current (CC)
- Size: L * W * H = 150mm * 53.5mm * 30.5mm
- Input: 220V-240VAC, 50/60Hz
- Max power: 25W
- Dimmable & Tunable white control (via Bluetooth & Switch-Dim)
- Human Centric Lighting / Circadian Rhythm (*See pg. 24)
- Multiple current selection via DIP-Switches
- Mobile/tablet app & PC web platform control
- 2 Switch-Dim (PUSH) terminals
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage range:
2-13W/ 250mA /10-52V, 3-16W/ 300mA /10-52V
4-18W/ 350mA /10-52V, 5-25W/ 500mA /10-50V
6-25W/ 600mA /10-42V, 7-25W/ 700mA /10-35V
8-23W/ 750mA /10-30V

NEW!

HED8025V/BT

Suitable for

- **Bluetooth®** 5.0 SIG Mesh (*See full details on pg. 05-11)
- Constant Voltage 24V (CV)
- Size: L * W * H = 150mm * 53.5mm * 30.5mm
- Input: 220V-240VAC, 50/60Hz
- Max power: 25W
- Dimmable & Tunable white control (via Bluetooth & Switch-Dim)
- Human Centric Lighting / Circadian Rhythm (*See pg. 24)
- Mobile/tablet app & PC web platform control
- 2 Switch-Dim (PUSH) terminals
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage: 25W/ 1050mA /24V

NEW!

HED8030/BT

Suitable for

- **Bluetooth®** 5.0 SIG Mesh (*See full details on pg. 05-11)
- Constant Current (CC)
- Size: L * W * H = 269mm * 36mm * 22mm
- Input: 220V-240VAC, 50/60Hz
- Max power: 30W
- Dimmable & Tunable white control (via Bluetooth & Switch-Dim)
- Human Centric Lighting / Circadian Rhythm (*See pg. 24)
- Multiple current selection via DIP-Switches
- Mobile/tablet app & PC web platform control
- 2 Switch-Dim (PUSH) terminals
- Max. Output Power/Current/Voltage range:
 - 3-15W/ 300mA /10-50V, 3-18W/ 350mA /10-50V
 - 4-20W/ 400mA /10-50V, 4-23W/ 450mA /10-50V
 - 5-25W/ 500mA /10-50V, 5-28W/ 550mA /10-50V
 - 6-30W/ 600mA /10-50V, 6-30W/ 650mA /10-46V
 - 7-28W/ 700mA /10-40V

- See category A for all HF & PIR sensor head options (*See pg. 80)
- See category B for all HF & PIR sensor head options (*See pg. 85)
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage range:
7-24W/500mA /15-48V, 9-29W/ 600mA /15-48V
10-34W/ 700mA /15-48V, 12-38W/ 800mA /15-48V
13-43W/ 900mA /15-48V, 15-43W/ 1000mA /15-43V

HED2020

Suitable for

- DALI DT6: Dimmable
- DALI addressable
- Constant Current (CC) & Constant Voltage (CV)
- Size: L * W * H = 150mm * 52mm * 28mm
- Input: 220V-240VAC, 50/60Hz
- Max power: 20W
- Configurable constant current (CC) & constant voltage (CV) via DIP-Switches
- Switch-Dim (PUSH) terminal
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage range:
15W/ 350mA /9~45V, 20W/ 500mA /9~43V
20W/ 700mA /9~30V, 20W/ 900mA /9~23V
- Constant voltage: 10W/12V; 20W/24V

HED2040

Suitable for

- DALI DT6: Dimmable
- DALI addressable
- 1-10V Dimmable
- Constant Current (CC)
- Size: L * W * H = 123.2mm * 79.2mm * 30mm
- Input: 220V-240VAC, 50/60Hz
- Max power: 40W
- Multiple current selection via DIP-Switches
- Switch-Dim (PUSH) terminal
- Max. Output Power/Current/Voltage range:
20W/ 350mA /12-58V; 23W/ 400mA /12-58V
26W/ 450mA /12-58V; 29W/ 500mA /12-58V
32W/ 550mA /12-58V; 35W/ 600mA /12-58V
38W/ 650mA /12-58V; 40W/ 700mA /12-58V
42W/ 750mA /12-56V; 45W/ 800mA /12-56V
45W/ 850mA /12-53V; 45W/ 900mA /12-50V
45W/ 950mA /12-47V; 45W/ 1000mA /12-45V
45W/ 1050mA /12-43V; 45W/ 1100mA /12-41V

HED2050

Suitable for

- DALI DT6: Dimmable
- DALI addressable
- 1-10V Dimmable
- Constant Current (CC)
- Size: L * W * H = 123.2mm * 79.2mm * 30mm
- Input: 220V-240VAC, 50/60Hz
- Max power: 50W
- Multiple current selection via DIP-Switches
- Switch-Dim (PUSH) terminal
- Max. Output Power/Current/Voltage range:
40.5W/ 700mA /12-58V, 43.5W/ 750mA /12-58V
46.5W/ 800mA /12-58V, 49W/ 850mA /12-58V
50W/ 900mA /12-56V, 50W/ 950mA /12-53V
50W/ 1000mA /12-50V, 50W/ 1050mA /12-48V
50W/ 1100mA /12-45V, 50W/ 1150mA /12-43V
50W/ 1200mA /12-42V, 50W/ 1250mA /12-40V
50W/ 1300mA /12-38V, 50W/ 1350mA /12-37V
50W/ 1400mA /12-36V

HED6020

Suitable for

- DALI DT6: Dimmable
- DALI addressable
- 1-10V Dimmable
- Constant Current (CC)
- Size: L * W * H = 150mm * 53.5mm * 30.5mm
- Input: 220V-240VAC, 50/60Hz
- Max power: 21.5W
- Multiple current selection via DIP-Switches
- Switch-Dim (PUSH) terminal
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage range:
15.5W/ 350mA /10-45V, 21.5W/ 500mA /10-43V
21W/ 700mA /10-30V, 20.5W/ 900mA /10-23V

HED4030-A

Suitable for

- DALI DT6: Dimmable
- DALI addressable
- 1-10V Dimmable
- Constant Voltage (CV) 12V
- Size: L * W * H = 150mm * 53.5mm * 30.5mm
- Input: 220V-240VAC
- Max power: 30W
- Switch-Dim (PUSH) terminal
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage range:
30W/ 2500mA / 12V

HED6030-A

Suitable for

- DALI DT6: Dimmable
- DALI addressable
- 1-10V Dimmable
- Constant Voltage (CV) 24V
- Size: L * W * H = 150mm * 53.5mm * 30.5mm
- Input: 220V-240VAC
- Max power: 30W
- Switch-Dim (PUSH) terminal
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage range:
30W/ 1250mA / 24V

HED2075-A

Suitable for

- DALI DT6: Dimmable
- DALI addressable
- 1-10V Dimmable
- Constant Voltage (CV) 12V
- Size: L * W * H = 220mm * 58mm * 42mm
- Input: 220V-240VAC
- Max power: 75W
- Switch-Dim (PUSH) terminal
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage range:
75W/ 6250mA / 12V

HED3075-A

Suitable for

- DALI DT6: Dimmable
- DALI addressable
- 1-10V Dimmable
- Constant Voltage (CV) 24V
- Size: L * W * H = 220mm * 58mm * 42mm
- Input: 220V-240VAC
- Max power: 75W
- Switch-Dim (PUSH) terminal
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage range:
75W/ 3125mA / 24V

HED1025

- DALI DT6: Dimmable
- DALI addressable
- Constant Current (CC)
- Size: L * W * H = 239mm * 36mm * 21.5mm
- Input: 220V-240VAC
- Max power: 28W
- Multiple current selection via DIP-Switches
- Switch-Dim (PUSH) terminal
- Optional motion sensor pluggable (Sensor-Dim)

- See category A for all HF & PIR sensor head options (*See pg. 80)
- See category B for all HF & PIR sensor head options (*See pg. 85)
- Max. Output Power/Current/Voltage range:
 - 19.5W/ 325mA /12-60V, 21W/ 350mA /12-60V
 - 22.5W/ 375mA /12-60V, 24W/ 400mA /12-60V

HEC6018

Suitable for

- Input: 220-240VAC, 50/60Hz
- Microwave detection (HF 5.8GHz \pm 75MHz)
- Cut-out size: L x D = 36mm * 29.5mm
- Tri-level dimming (*See pg. 19)
- Daylight sensor: Photodiode
- Active Lux Switching technology (*See pg. 15)
- Max installation height: 5m
- Max detection range: \varnothing = 8m (diameter)
- Sensor settings via DIP-Switches
- Max power: 18W
- Constant Current (CC)
- Max. Output Power/Current/Voltage range:
11.5-18W / 500mA / 23-36V

*What is Hex-Drive?

Hex-Drive is the flagship product range of Hytronik LED drivers, designed to integrate various functions for maximizing luminaire design flexibility. This driver series comes with an RJ12 connector which is ready for attaching a wide range of Bluetooth sensor "heads", ranging from microwave (HF) to PIR, from low-bay to high-bay...

When motion sensor unplugged, the Hex-drive alone is a standard DALI compliant driver, possessing 1-10V and Switch-Dim (PUSH) dimming capability as well. All Hex-drive models have multiple current selection feature via DIP-Switch settings.

*What is Hex-Drive?

Hex-Drive is the flagship product range of Hytronik LED drivers, designed to integrate various functions for maximizing luminaire design flexibility. This driver series comes with an RJ12 connector which is ready for attaching a wide range of Bluetooth sensor "heads", ranging from microwave (HF) to PIR, from low-bay to high-bay...

When motion sensor unplugged, the Hex-drive alone is a standard DALI compliant driver, possessing 1-10V and Switch-Dim (PUSH) dimming capability as well. All Hex-drive models have multiple current selection feature via DIP-Switch settings.

Common Highlight Features for HBEM series:

- Bluetooth® 5.0 SIG Mesh (*See full details on pg. 01-02)
- Input: 220V-240VAC, 50/60Hz
- Constant Emergency Wattage (CW)
- Multiple current selection / emergency power / time selection via DIP-Switches
- Four emergency working modes for options
- Monthly / Yearly self-test with auto report generation
- Retrievable usage data and history record
- Automatic email notification when detecting fault
- Works with LiFePO₄ battery
- Optional motion sensor pluggable (Sensor-Dim)
- Optional LED indicator & test switch accessory

NEW! HBEM01

- Emergency driver
- Constant Current (CC)
- Size: L * W * H = 108mm * 69mm * 22.2mm
- Max. emergency output power: 2W / 3W
- Max. loading: 25W
- Dimmable (via Bluetooth & Switch-Dim)
- Switch-Dim (PUSH) terminal
- Max. Output Power/Current/Voltage range:
8-17.5w / 350mA / 24-50V, 12-25W / 500mA / 24-50V
16-25W / 700mA / 24-36V

- Emergency driver
- Constant Current (CC)
- Size: L * W * H = 140.6mm * 79.2mm * 23mm
- Max. emergency output power: 2W / 3W / 4W
- Max. loading: 45W
- Switch-Dim (PUSH) terminal
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage range:
8-17.5w / 350mA / 24-50V, 12-25W / 500mA / 24-50V
16-35W / 700mA / 24-50V, 21.6-40W / 900mA / 24-45V

NEW! HBEM04

- Emergency inverter (for DALI dimmable driver)
- Size: L * W * H = 108mm * 69mm * 22.2mm
- Max. emergency output power: 2W / 3W / 4W / 5W
- Max. loading: 5W
- Switch-Dim (PUSH) terminal
- Max. Output Power/Current/Voltage range:
2W / 85-40mA / 24-55V, 3W / 125-60mA / 24-55V
4W / 160-80mA / 24-55V, 5W / 200-100mA / 24-55V

NEW! HBEM05

Suitable for

- Emergency inverter (for DALI dimmable driver)
- Size: L * W * H = 140.6mm * 79.2mm * 23mm
- Max. emergency output power: 6W / 8W / 10W / 12W
- Max. loading: 12W
- Switch-Dim (PUSH) terminal
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage range:
6W / 250-100mA / 24-55V, 8W / 330-145mA / 24-55V
10W / 415-180mA / 24-55V, 12W / 500-220mA / 24-55V

HBEM8200/F

Suitable for

- Bluetooth® 5.0 SIG Mesh (*See full details on pg. 05-11)
- Input: 220V-240VAC, 50/60Hz
- DALI-to-Bluetooth converter/translator module
- Convert/Translate a standard DALI/DALI-2 emergency driver output to Bluetooth output, so that user can view, edit & manage the emergency system through high-end Koolmesh platform
- User can then enjoy all the powerful & convenient features in Koolmesh platform, including automatic email notification upon detecting fault, automatic monthly/yearly (functional/duration test) emergency report generation etc...
- Point-to-point control: 1 pc HBEM8200/F module for 1 pc 3rd party DALI/DALI-2 emergency driver
- HBEM8200/F & the 3rd party standard DALI/DALI-2 emergency driver does not connect to central DALI PSU. HBEM8200/F provides power supply to the 3rd party standard DALI/DALI-2 emergency driver
- With Bluetooth gateway HBGW01, user can remotely control the emergency system via Koolmesh mobile/tablet app & web app platform
- Module settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals

Technical Data & Specifications

- Input: 220-240VAC 50/60Hz
- Output (Max Loading): 80mA DALI power supply
- Warming-up period: 20s
- Passive infrared (PIR) detection
- Ta: -20°C ~ +50°C

Features & Functions

- Bluetooth® 5.0 SIG Mesh (*See full details on pg. 05-11)
- DALI-to-Bluetooth converter/translator module
- Convert/Translate a standard DALI/DALI-2 emergency driver output to Bluetooth output, so that user can view, edit & manage the emergency system through high-end Koolmesh platform
- User can then enjoy all the powerful & convenient features in Koolmesh platform, including automatic email notification upon detecting fault, automatic monthly/yearly (functional/duration test) emergency report generation etc...
- Point-to-point control: 1 pc HBIREM29 module for 1 pc 3rd party DALI/DALI-2 emergency driver

- Tri-level dimming & Daylight harvest (*See pg. 19-21)
- Daylight sensor: Photocell, except HBIREM29/WV: Photodiode (PD)
- Active Lux Switching technology (*See pg. 15)
- Presence mode / Absence mode (Auto / Semi-auto) (*See pg. 26)
- HBIREM29 & the 3rd party standard DALI/DALI-2 emergency driver does not connect to central DALI PSU. HBEM8200/F provides power supply to the 3rd party standard DALI/DALI-2 emergency driver
- With Bluetooth gateway HBGW01, user can remotely control the emergency system via Koolmesh mobile/tablet app & web app platform
- Sensor settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals
- Optional IP20/IP65 ceiling mount box accessory HA03
- Optional blind insert / blanking plate accessory (Not applicable on HBIREM29/WV, HBIREM29/RH)
- Tool-free installation: removable terminal blocks and clips

HEM09

Suitable for

- Constant Emergency Wattage (CW)
- Size: L * W * H = 140.6mm * 79.2mm * 23 mm
- Input: 220V-240VAC, 50/60Hz
- Max. emergency output power: 3W / 4W / 6W
- Dual wattage and duration selection:
>3h @3W; >1.5h @4W; >1.5h @6W
- Multiple current selection / emergency power via DIP-Switches
- Automatic output current adjustment
- With self-testing function, maintenance free
- Wide range of LEDs in series (10~52V)
- Works with NiMH battery / Nicd battery
- 1-10V dimming control with relay output
- Switch-Dim (PUSH) terminal
- Three protection mode with auto-retart
- Sensor settings via handset HRC-05
- Optional motion sensor pluggable (Sensor-Dim)
- Optional LED indicator & test switch accessory
- Optional terminal-caps for stand-alone installation
- Max. Output Power/Current/Voltage range:
18W/ 350mA /10-52V, 26W/ 500mA /10-52V
28W/ 550mA /10-52V, 30W/ 700mA /10-43V
30W/ 750mA /10-40V, 23W/ 900mA /10-25V

HEM09H

Suitable for

What Is Hytronik's New Modular Wiring System ?

Hytronik is pleased to introduce to you our new Modular Wiring System for lighting control applications. The Modular wiring system consists of Quick Connect Boxes (QCB series), cables and plugs, ceiling rose components, and a wide range of sensor/controller selections. Typical applications include warehouse, commercial lighting, retail, healthcare, education, leisure, and office areas. The design concept is to simplify wiring processes on project sites, making it extremely simple and intuitive for installers and project managers by easy plug 'n' play connections, which significantly saves the labor cost, minimizes installation time, improves safety level during operations, and also simplifies future upgrade & maintenance.

Modular Wiring System Overview

Benefits & Privileges

For Contractor / Partner

- Free project consultation/advice
- Minimize spending/budget on installation and commissioning
- Save project time significantly
- Comply with safety standards
- One stop solution for consultation/control/purchasing
- Multiple functions design reduces model inventories

For Lighting Consultant / Designer

- Free product training
- Optimal product recommendation case by case
- Floorplan feature to simplify designing process
- Bluetooth mesh eliminates the need for complex hard wirings
- Wide product/control range to cover all kinds of applications
- Powerful web platform for easy configuration profile preset

For Electrician / Installer

- Safe on-load connection / disconnection
- Safe electromechanical connection
- Pre-set configuration profile keeps commissioning to a minimum
- Significantly save time by uploading preset configuration profiles to devices directly
- Complete pluggable solution simplifies the installation
- Downloadable configuration settings for keeping records
- One-key device replacement featured

For Project Owner / Maintenance

- Maximum energy saving with visualized statistics
- Comprehensive permission management
- Trouble-free!
- Future-proof! Batch OTA upgrade through mesh/gateway easily
- Monitor building's operational status remotely
- Emergency report auto-generation with data analysis and diagnosis
- Automatic fault notification via email
- "Tamperproof" screws to prevent unwanted attempts to take the unit apart
- Simplified maintenance

For Environment

- Recyclable packages & components
- Low smoke emission & halogen free materials
- Maximized energy saving
- Reduced material waste

Surface Mount ▼

It can work with 4 x M6 screws to fix onto both walls and ceilings.

BESA/Junction Box Connection ▼

It can be connected with BESA/junction box.

Channel Nut Mount ▼

It can work with channel nuts to fasten into the back.

Mounting Rods ▼

It can be fixed with mounting rods.

Marco Tray Mount ▼

It can work with Marco clips steel wire cables tray system.

Connectivity

Mains input part:

Cable gland (together with removable cable-entry plates) and spacious wiring compartment provide easy wiring fixings.

Control inputs & outputs part:

Luminaire connections (including standard luminaire & emergency luminaire) and sensor connections are all pluggable design using cables & plugs. No hard-wiring needed at all!

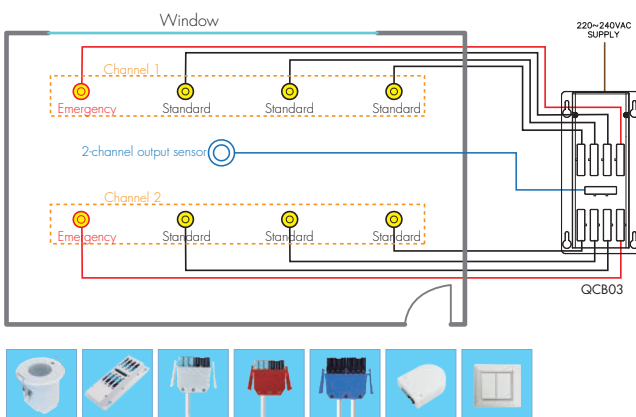

Typical Applications Example

One-channel control with 1pc sensor

Two-channel control with 1pc sensor window row switching/dimming

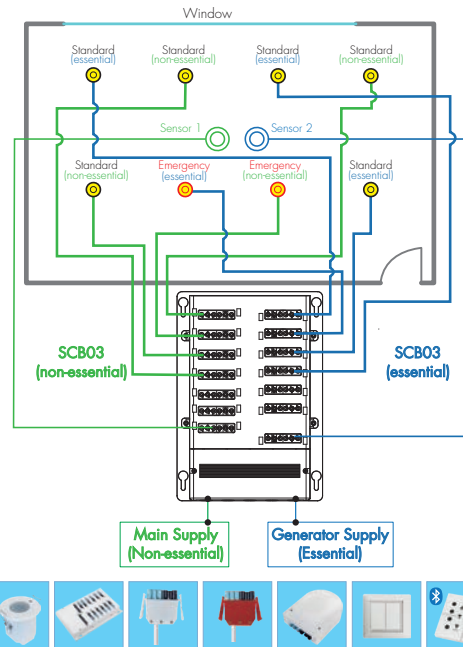

One-channel controlled by ≥ 2 pcs sensors synchronously simple corridor solutions!

Two-channel controlled by 2pcs sensors seperately

Dual-circuit application with non-essential & essential supplies

Connection Boxes

QCB01/BLE-S

* White color housing by default. Black color housing can be supplied upon request; Max. 10A can be supplied as a special version upon request

Key Features

- Non-dimmable control applications
- Intelligent control with Bluetooth 5.0 SIG mesh module built in
- 2 types of built-in Bluetooth 5.0 control module to select from
- Detailed Bluetooth system features can be viewed on page 05-11
- Luminaire outlet: GST type 4-pole terminal base (L', N, E, Em)
- Black housing and white housing available to choose from
- Tamper-proof structure design
- Expandable: easy extension to another QCB01/BLE-S wirelessly
- Rating of system: Default rating is 400VA capacitive & 800W resistive
- Max 10A can be supplied as a special version upon request
- Flame-retardant material for safety protection

Your Benefits

- Five types of installation methods meets different project needs
- Reduce labour hours and labour cost significantly
- Simple and intuitive wiring connections
- Improved safety level during wiring operations
- Clear and clean wiring makes it easy for future maintenance
- Can be supplied with pre-wired cables

Model name	Description
QCB01/BLE-S	GST type 4-pole terminal base quick connection box for non-dimmable control applications. With 8 luminaire outlets for one-channel control and Bluetooth control HBTD8200S/F built-in. Default rating 400VA@ capacitive & 800W@ resistive

Dimensions (mm)

Input & Output Terminal Function

Wire Range: 0.75 - 4.0mm² (max. 2 x 2.5mm²)

Luminaire outlet

QCB01/BLE-S

In the middle of the QCB01/BLE there is a pre-installed Bluetooth 5.0 SIG mesh controller module. The Bluetooth controller module controls all the 8 luminaire outlets as one channel (1 x 8). Default rating for this controller module is 400VA capacitive & 800W resistive. If higher loading capability is required, we can supply a special version with max 10A capability upon request.

What's so Helpful about QCB01/BLE-S Bluetooth "Intelligent" Control ?

1. User enjoys the full set of powerful Bluetooth features (see page 05-11 for details).

2. When used with Hytronik's Bluetooth on/off motion sensor, the Bluetooth sensor can control all the luminaires wirelessly without needing to be hard-wired to the QCB01/BLE-S.

Hytronik's Bluetooth sensor can be plugged to a nearest ceiling rose, without needing to connect a long cable to the QCB01/BLE-S. This Bluetooth sensor will be able to wirelessly control all the luminaires that are connected to the QCB01/BLE-S. This is extremely useful by saving long cable wirings when there are multiple Bluetooth sensors controlling a same group of luminaires.

3. When used with an ordinary non-Bluetooth on/off motion sensor (can be Hytronik's sensor or can be from any third-party), the built-in Bluetooth 5.0 controller "upgrades" this ordinary on/off sensor to a Bluetooth smart control sensor.

With a built-in Bluetooth 5.0 controller in QCB01/BLE-S, an ordinary motion sensor can be "upgraded" to Bluetooth smart control using an App feature called "Sensor-link", which is easily achieved by wiring the L' of the ordinary sensor to the PUSH terminal of the QCB01/BLE-S. With this feature, the motion sensor works normally while the advanced Bluetooth control features such as scheduling, timer & recall scenes will all perform well at the same time.

Besides, there will be no requirement for the sensor's loading capability. Sensor just picks up motion and sends trigger signal, the loading capability is purely determined by the QCB01/BLE-S, which is 400VA capacitive & 800V resistive by default, and a special version of max 10A can be supplied upon request if higher loading capability is required. In other words, the sensor's loading capability can be as small as possible to save project cost, as 1A and 10A have no differences at all in this case.

4. Traditional way to extend number of luminaire outlets requires hard-wiring from one box to another. Now thanks to the Bluetooth mesh network, QCB01/BLE-S can be easily extended to another QCB01/BLE-S wirelessly!

5. QCB01/BLE-S can be wirelessly controlled by an EnOcean Bluetooth self-powered switch or Hytronik's Bluetooth touch panel HBPO2.

QCB01

* White color housing by default. Black color housing can be supplied upon request.

Key Features

- Non-dimmable control applications
- 8 luminaire outlets + 1 extra sensor outlet for sensor connection
- Luminaire outlet: GST type 4-pole terminal base (L', N, E, Em)
- Sensor outlet: GST type 8-pole terminal base (L, N, E, L1', L2', P1, P2)
- Black housing and white housing available to choose from
- Freely switch between 1-channel (1 x 8) & 2-channel (2 x 4) control
- Tamper-proof structure design
- Expandable: easy extension to another QCB01/ECO via plug' n' play
- Rating of system: Max 16A. Rating of each output: Max 10A
- Flame-retardant material for safety protection

Your Benefits

- Five types of installation methods meets different project needs
- Reduce labour hours and labour cost significantly
- Simple and intuitive wiring connections
- Improved safety level during wiring operations
- Clear and clean wiring makes it easy for future maintenance
- Can be supplied with pre-wired cables

Model name	Description
QCB01	GST type 4-pole terminal base quick connection box for non-dimmable control applications, with 8 luminaire outlets and 1 sensor outlet. Freely switch between 1-channel and 2-channel control. Rating of system 16A, rating of each output 10A.

Input & Output Terminal Function

Factory default for QCB01 comes with a pre-installed jumper wire, which short-connects Switched L1 and Switched L2 together. With this jumper wire, all the 8 luminaire outlets are considered as in a same channel (1 x 8) that are controlled together by the sensor/controller.

By removing this pre-installed jumper wire, the 8 outlets are then divided into two separate channels. This QCB01 becomes a 2-channel box with 2 x 4 luminaire outlet. The two channels will be controlled separately (Channel 1 is controlled by Switched L1, and Channel 2 is controlled by Switched L2).

QCB01/ECO

* White color housing by default. Black color housing can be supplied upon request.

Key Features

Ceiling Rose

Ceiling rose QCCR01 can be used when there is a need to take power from a conduit box. The installation-friendly design comes with a very spacious termination space for really easy wirings.

Key Features:

- Can be freely placed or fixed with BESA/junction box
- Taking power from BESA/junction box
- 4-pole GST type connector (L, E, N, Em)
- Allowing fast connection with Hytronik quick connection box
- 15mm depth big cabling space
- 48-68mm pitch for conduit mounting
- Nominal current max. 16A
- Flame-retardant material for safety protection

*QCCR01 is supplied with white color housing by default. Black color housing can be supplied upon request.

Input & Output Terminal Function

In the middle of the QCB02/BLE there is a pre-installed Bluetooth 5.0 SIG mesh controller module. We offer 4 types of different controller modules for users to choose from. For each controller module, all the 8 luminaire outlets are regarded as one channel (1 x 8).

Default max rating for QCB02/BLE-D2 & QCB02/BLE-DCA & QCB02/BLE-DTY is 100mA;

Default max rating for QCB02/BLE-V is 400VA Capacitive & 800W Resistive. Max 10A can be supplied as a special version upon request.

Connecting to **linect** System!

QCB02/BLE products are also able to be integrated to Linect connection **linect** system. With the T-connector module, connection to luminaires can be easily extended (luminaire needs to be **linect** connection enabled).

What's so Helpful about QCB02/BLE Series Bluetooth "Intelligent" Control ?

(For Casambi's and Tuya's products, they have overall pretty much similar benefits and capabilities but still vary from one to another when it comes to the details. Users can always refer to Casambi's or Tuya's corresponding Bluetooth system to learn their capabilities and differences accordingly)

1. User enjoys the full set of powerful Bluetooth features
(see page 05-11 for details).

2. When used with Hytronik's Bluetooth on/off motion sensor, the Bluetooth sensor can control all the luminaires wirelessly without needing to be hard-wired to the QCB02/BLE.

Hytronik's Bluetooth sensor can be plugged to a nearest ceiling rose, without needing to connect a long cable to the QCB02/BLE. This Bluetooth sensor will be able to wirelessly control all the luminaires that are connected to the QCB02/BLE. This is extremely useful by saving long cable wirings when there are multiple Bluetooth sensors controlling a same group of luminaires.

Thanks to the built-in Bluetooth 5.0 controller, QCB02/BLE is born to comes with dimming output to the luminaires (namely, **QCB02/BLE-V** provides 0/1-10V output, **QCB02/BLE-D2** provides DALI/DALI-2 output. So the sensor only needs to be a non-dimmable on/off sensor that just picks up motion and sends out trigger signal via Bluetooth, and all the dimming controls will be performed by the QCB02/BLE box itself.

This makes sensor selections easy and cost-effective, aiming to cut the budget cost and reduce sensor model inventories for users.

Dimming Control Capability			
 With Hytronik's On/Off Bluetooth sensor HBIR28		QCB02/BLE-V (0/1-10V output)	QCB02/BLE-D2 (DALI/DALI-2 output)
	Lux on/off control	✓	✓
	Tri-level control (Corridor function)	✓	✓
	Daylight harvest control (Daylight regulating/interaction)	✓	✓
	Color tuning control		✓
	Circadian rhythm control (Human Centric Lighting)		✓

Besides, there will be no requirement for the sensor's loading capability. Sensor just picks up motion and sends trigger signal via Bluetooth, the loading capability is purely determined by QCB02/BLE, which depends on internal control module selections. For **QCB02/BLE-D2**, the max. DALI power supply is 100mA; and for **QCB02/BLE-V**, the max. rate is 400VA capacitive & 800W resistive by default, and a special version of max 10A can be supplied upon request if higher loading capability is required. In other words, the sensor's loading capability can be as small as possible to save project cost, as 1A and 10A have no differences at all in this case.

What's so Helpful about QCB02/BLE's & QCB03/BLE's

Bluetooth "Intelligent" Control ?

- When used with an ordinary non-Bluetooth on/off motion sensor (can be Hytronik's sensor or can be from any third-party), the built-in Bluetooth 5.0 controller "upgrades" this ordinary on/off sensor to a Bluetooth smart control sensor, with tri-level control dimming control.

With a built-in Bluetooth 5.0 controller in QCB02/BLE, an ordinary motion sensor can be "upgraded" to Bluetooth smart control using an App feature called "Sensor-link", which is easily achieved by wiring the L' of the ordinary sensor to the PUSH terminal of the QCB02/BLE. With this feature, the motion sensor works normally while the advanced Bluetooth control features such as scheduling, timer & recall scenes will all perform well at the same time.

Meanwhile, another great thing about "Sensor-link" feature is that, it will "upgrade" an on/off motion sensor to have tri-level dimming function (corridor function)! The on/off sensor that just picks up motion and sends out trigger signal via Bluetooth, and tri-level dimming control will be performed by the QCB02/BLE box

itself and users can set up stand-by parameters in the app freely. This makes sensor selections easy and cost-effective, aiming to cut the budget cost and reduce sensor model inventories for users.

Besides, there will be no requirement for the sensor's loading capability. Sensor just picks up motion and sends trigger signal, the loading capability is purely determined by the QCB02/BLE, which depends on internal control selections. For **QCB02/BLE-D2**, the max. In other words, the sensor's loading capability can be as small as possible to save project cost, as 1A and 10A have no differences at all in this case.

- Traditional way to extend number of luminaire outlets requires hard-wiring from one box to another. Now thanks to the Bluetooth mesh network, QCB02/BLE can be easily extended to another QCB02/BLE wirelessly!

- QCB02/BLE can be wirelessly controlled by an EnOcean Bluetooth self-powered switch or Hytronik's Bluetooth touch panel HBP02.

Factory default for QCB02 comes with two pre-installed jumper wires. The black jumper wire short-connects DA₁- and DA₂-, and the white jumper wire short-connects DA₁+ and DA₂+. With these jumper wires, user can freely switch between one-channel and two-channel control.

- 1) one-channel (1 x 8) DALI dimming --- keep both black wire & white wire.
- 2) two-channel (2 x 4) dual DALI dimming --- remove both black wire & white wire.

In this case the two channels will be controlled separately (channel 1 is controlled by DA₁+ & DA₁-, and channel 2 is controlled by DA₂- & DA₂+).

This flexible design aims to reduce model inventories for users, and just one box is capable enough to handle different requirements on the project site. Easy for management, and powerful for usage!

QCB03	GST type 6-pole terminal base quick connection box for dimming application, with DALI/DALI-2 or 0/1-10V output, 8 luminaire outlets and 1 sensor outlet. Freely switch between 1-channel and 2-channel control. Rating of system 16A, rating of each output 10A.

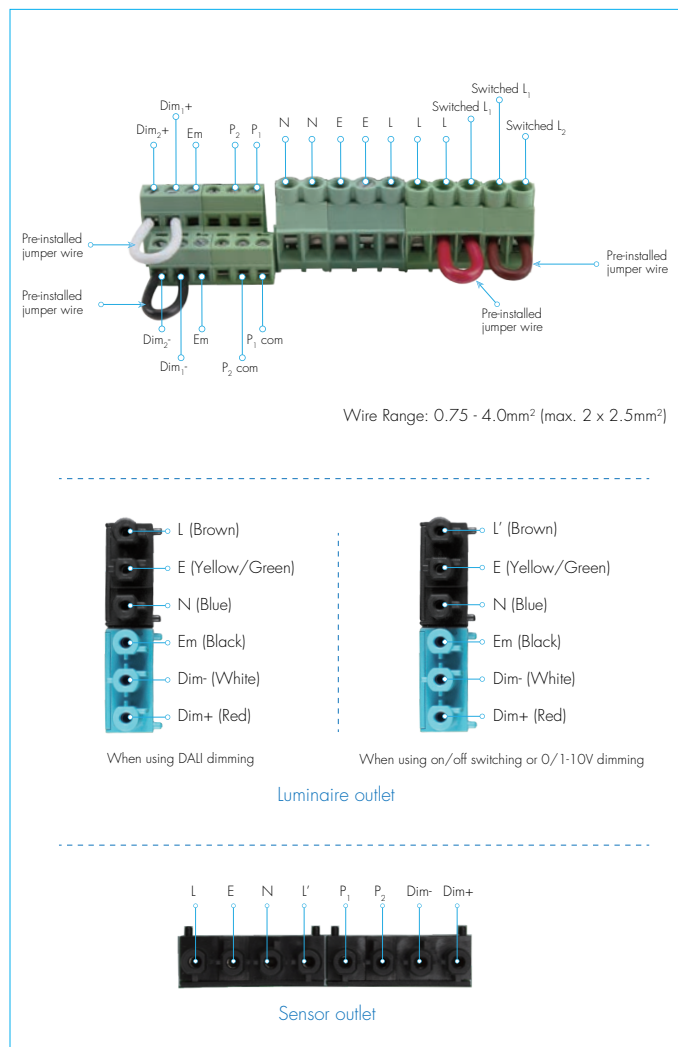

Your Benefits

- Five types of installation methods meets different project needs
- Reduce labour hours and labour cost significantly
- Simple and intuitive wiring connections
- Improved safety level during wiring operations
- Clear and clean wiring makes it easy for future maintenance
- Can be supplied with pre-wired cables

Dimensions (mm)

Input & Output Terminal Function

Factory default for QCB03 comes with four pre-installed jumper wires. The brown wire short-connects Switched L1 and Switched L2 together, the red jumper wire short-connects Switched L1 and L, the black jumper wire short-connects Dim₁⁻ and Dim₂⁻, and the white jumper wire short-connects Dim₁⁺ and Dim₂⁺. With these jumper wires, user can freely choose different dimming control method and also freely switch between one-channel and two-channel control.

- 1) one-channel (1 x 8) DALI dimming --- keep all four jumper wires.
- 2) two-channel (2 x 4) dual DALI dimming --- keep red wire & brown wire, remove black wire & white wire.
In this case the two channels will be controlled separately (channel 1 is controlled by Dim₁⁺ & Dim₁⁻, and channel 2 is controlled by Dim₂⁻ & Dim₂⁺).
- 3) one-channel (1 x 8) 0/1-10V dimming --- remove red wire, keep brown wire & black wire & white wire.
- 4) two-channel (2 x 4) dual 0/1-10V dimming --- remove all four jumper wires.
In this case the two channels will be controlled separately (channel 1 is controlled by Switched L1, Dim₁⁺ & Dim₁⁻, and channel 2 is controlled by Switched L2, Dim₂⁻ & Dim₂⁺).
- 5) two-channel (2 x 4) DALI dimming + on/off switching --- keep red wire, remove brown wire & black wire & white wire.
In this case the two channels will be controlled separately (channel 1 is controlled by Dim₁⁺ & Dim₁⁻, and channel 2 is controlled by Switched L2).
- 6) two-channel (2 x 4) 0/1-10V dimming + on/off switching --- remove all four jumper wires.
In this case the two channels will be controlled separately (channel 1 is controlled by Dim₁⁺ & Dim₁⁻, and channel 2 is controlled by Switched L2).

This flexible design aims to reduce model inventories for users, and just one box is capable enough to handle different dimming requirements on the project site. Easy for management, and powerful for usage!

What's so Helpful about SCB01/BLE Bluetooth "Intelligent" Control ?

1. User enjoys the full set of powerful Bluetooth features
(see page 05-11 for details).

2. Traditional way to extend number of luminaire outlets requires hard-wiring from one box to another. Now thanks to the Bluetooth mesh network, SCB01/BLE can be easily extended to another SCB01/BLE wirelessly!

Ceiling Rose

Ceiling rose QCCR02 can be used when there is a need to take power and dimming signal from a conduit box. The installation-friendly design comes with a very spacious termination space for really easy wirings.

Key Features:

- Can be freely placed or fixed with BESA/junction box
- Taking power from BESA/junction box
- 6-pole GST type connector (L, E, N, Em, Dim+, Dim-)
- Allowing fast connection with Hytronik quick connection box
- 15mm depth big cabling space
- 48-68mm pitch for conduit mounting
- Nominal current max. 16A
- Flame-retardant material for safety protection

*QCCR02 is supplied with white color housing by default. Black color housing can be supplied upon request.

- Module settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals

HBTD8200V

Suitable for

- Bluetooth® 5.0 SIG Mesh
- Designed for junction box / electrical box installation
- Input: 220V-240VAC, 50/60Hz
- Output (Max Loading): 400VA capacitive / 800W resistive
- 0/1-10V dimmer & controller
- Module settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals

HBTD8200T

Suitable for

- Bluetooth® 5.0 SIG Mesh
- Designed for junction box / electrical box installation
- Input: 230V, 50Hz
- Output (Max Loading): 150VA capacitive / 150W resistive
- Trailing edge dimmer & controller
- Module settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals

HBTD8200T2

Suitable for

- Bluetooth® 5.0 SIG Mesh
- Designed for junction box / electrical box installation
- Input: 230V, 50Hz
- Output (Max Loading): 2x100VA capacitive / 2x150W resistive
- Dual trailing edge dimmer & controller
- Module settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals

NEW!

HBTD8200P

Suitable for

- Bluetooth® 5.0 SIG Mesh
- Designed for junction box / electrical box installation
- Input: 220-240VAC, 50/60Hz
- SELV switch input module
- Module settings via mobile/tablet app & PC web platform
- 4 SELV switch input terminals

NEW!

HBTD8200PDC

Suitable for

- Bluetooth® 5.0 SIG Mesh
- Designed for junction box / electrical box installation
- Input: 12VDC
- SELV switch input module
- Module settings via mobile/tablet app & PC web platform
- 4 SELV switch input terminals

NEW!

HBTD8200D/CA

Suitable for

- Casambi Bluetooth® module built-in
- Designed for junction box / electrical box installation
- DALI dimmer & controller
- Input: 220V-240VAC, 50/60Hz
- Output (Max Loading): 100mA DALI power supply
- Module settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals

NEW!

HBTD8200D/TY

Suitable for

- Tuya Bluetooth® module built-in
- Designed for junction box / electrical box installation
- DALI dimmer & controller
- Input: 220V-240VAC, 50/60Hz
- Output (Max Loading): 100mA DALI power supply
- Module settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals

HD2200

Suitable for

- Trailing edge dimmer & controller
- Designed for junction box / electrical box installation
- Input: 230V, 50Hz
- Output (Max Loading): 150W capacitive / 200W resistive
- Switch-Dim (PUSH) terminal
- Switch-Dim (PUSH) to trailing edge converter
- Adjustable minimum brightness level

HDD2200

Suitable for

- Trailing edge dimmer & controller
- Designed for junction box / electrical box installation
- Input: 220V-240VAC, 50/60Hz
- Output (Max Loading): 200VA capacitive / 200W resistive
- DALI to trailing edge converter
- DALI Addressable
- Optional terminal-caps

HDS2400

Suitable for

- On/Off switch & controller
- Designed for junction box / electrical box installation
- Input: 220V-240VAC, 50/60Hz
- Output (Max Loading): 400VA capacitive / 800W resistive
- DALI to On/Off converter
- DALI Addressable
- Optional terminal-caps

HD8200V

Suitable for

- 0/1-10V dimmer & controller
- Designed for junction box / electrical box installation
- Input: 220V-240VAC, 50/60Hz
- Output (Max Loading): 400VA capacitive / 800W resistive
- 2 Switch-Dim (PUSH) terminals
- Switch-Dim (PUSH) to 1-10V converter

NEW!

HDD8200

Suitable for

- DALI broadcast dimmer & controller
- Designed for junction box / electrical box installation
- Input: 220V-240VAC, 50/60Hz
- Output (Max Loading): 100mA DALI power supply
- 2 Switch-Dim (PUSH) terminals
- Switch-Dim (PUSH) to DALI converter

HBTD8200S/F

Suitable for

- Bluetooth® 5.0 SIG Mesh
- Input: 220V-240VAC, 50/60Hz
- Output (Max Loading): 400VA capacitive / 800W resistive
- On/Off switch with relay output
- Module settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals

NEW!

HBTD8200VFC/F

Suitable for

- Bluetooth® 5.0 SIG Mesh
- Input: 220V-240VAC, 50/60Hz
- Output (Max Loading): 24VDC≤2A, 250VAC≤4A
- VFC: Volt-free Contact / Dry Contact
- On/Off control with relay output
- Module settings via mobile/tablet app & PC web platform

HBTD8200D/F

Suitable for

- Bluetooth® 5.0 SIG Mesh
- Input: 220V-240VAC, 50/60Hz
- Output (Max Loading): 100mA DALI power supply
- DALI-2 dimmer & controller
- Module settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals

HBTD8200V/F

Suitable for

- Bluetooth® 5.0 SIG Mesh
- Input: 220V-240VAC, 50/60Hz
- Output (Max Loading): 400VA capacitive / 800W resistive
- 0/1-10V dimmer & controller
- Module settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals

HBTD8200T/F

Suitable for

- Bluetooth® 5.0 SIG Mesh
- Input: 230V, 50Hz
- Output (Max Loading): 150VA capacitive / 150W resistive
- Trailing edge dimmer & controller
- Module settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals

NEW!

HBTD8200D/TY/F

Suitable for

- Tuya **Bluetooth**® module built-in
- DALI dimmer & controller
- Input: 220V-240VAC, 50/60Hz
- Output (Max Loading): 100mA DALI power supply
- Module settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals

NEW!

HBTD8200D/F/CA

Suitable for

- Casambi **Bluetooth**® module built-in
- DALI dimmer & controller
- Input: 220V-240VAC, 50/60Hz
- Output (Max Loading): 100mA DALI power supply
- Module settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals

HBTD9200S/F

Suitable for

- **Bluetooth**® 5.0 SIG Mesh
- Input: 120-277VAC, 50/60Hz
- Output (Max Loading): 400VA capacitive / 800W resistive
- On/Off switch with relay output
- Module settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals

HBTD9200V/F

Suitable for

- **Bluetooth**® 5.0 SIG Mesh
- Input: 120-277VAC, 50/60Hz
- Output (Max Loading): 400VA capacitive / 800W resistive
- 0/1-10V dimmer & controller
- Module settings via mobile/tablet app & PC web platform
- 2 Switch-Dim (PUSH) terminals

NEW!

HBTD9200VFC/F

Suitable for

- **Bluetooth**® 5.0 SIG Mesh
- Input: 120-277VAC, 50/60Hz
- Output (Max Loading): 24VDC≤2A, 250VAC≤4A
- VFC: Volt-free Contact / Dry Contact
- On/Off control with relay output
- Module settings via mobile/tablet app & PC web platform

System Level Components

Bluetooth® Gateway

NEW!

HBGW01

- **Bluetooth®** 5.0 SIG Mesh (*See full details on pg. 05-11)
- Input: 120V-277V, 50/60Hz
- Data transmission between Mesh network & Ethernet
- RJ45 Ethernet port 100M
- 2.4G+5G dual Wi-Fi
- Dual Wi-Fi antenna (both internal & external)
- Mobile/tablet app & PC web platform control
- Quick and easy trouble shooting
- Remote control & monitoring
- Real-time synchronization
- Internet-of-Things (IoT) features enabled

Bluetooth® Panel

HBP02

- **Bluetooth®** 5.0 SIG Mesh (*See full details on pg. 05-11)
- Touch Panel, designed for junction box / electrical box installation
- Input: 220V-240V, 50/60Hz
- RTC keeps real-time for up to 7-8 weeks against power failure
- 4 buttons for brightness/color temperature adjustment
- 6 scenes buttons can be assigned using the App
- Touch screen with vibration/beeper/LED indication
- Clean mode/Screen lock time
- One-key sensor take over function
- Manual adjustment: on/off, dim and color tuning
- Manual / Auto display screen brightness adjustment
- Mobile/tablet app control

DALI Panel

- Touch Panel, designed for junction box / electrical box installation
- Input: 9.5-22.5VDC
- DALI Broadcast
- Group control or broadcast control via rotary switch
- 4 buttons for brightness/color temperature adjustment
- 6 scenes buttons correspondent to DALI scene 1-4
- Touch screen with beeper/LED indication
- Clean mode/Screen lock time
- Manual adjustment: on/off, dim and color tuning

Bluetooth® EnOcean Self-Powered Wireless Switches

Self-powered IoT

NEW!

HBES01/W

Single Rocker: 2 push buttons

Two Rockers: 4 push buttons

*The package contains a single rocker and two smaller rockers altogether.

- EnOcean Self-Powered Switch (battery free)
- Equipped with EnOcean Bluetooth Module PTM215B
- Both single rocker (2 push) & two small rockers (4 push) are included for user to freely select and install
- Fully support Hytronik's Bluetooth Eco-system products

NEW!

HBES01/B

Single Rocker: 2 push buttons

Two Rockers: 4 push buttons

*The package contains a single rocker and two smaller rockers altogether.

- EnOcean Self-Powered Switch (battery free)
- Equipped with EnOcean Bluetooth Module PTM215B
- Both single rocker (2 push) & two small rockers (4 push) are included for user to freely select and install
- Fully support Hytronik's Bluetooth Eco-system products

Bluetooth® Real-time Keeper & Repeater Module

HTG01

- Input: 120V-277V, 50/60Hz
- Standard version with up to 30m transmission distance
- Ability to keep up to 12 weeks mesh network real-time against power failure
- Works as a Bluetooth repeater node to relay communication signal and extend mesh distance
- Stand-alone installation design to fix into junction box

- Input: 120V-277V, 50/60Hz
- Standard version with up to 30m transmission distance
- Ability to keep up to 12 weeks mesh network real-time against power failure
- Works as a Bluetooth repeater node to relay communication signal and extend mesh distance
- Built-in design for OEMs with screw holes for mounting

HTG01/F

HTG02

Antenna Option 1

Antenna Option 2

- Input: 120V-277V, 50/60Hz
- Reinforced version with up to 50m transmission distance
- Two styles of antenna to choose from
- Ability to keep up to 12 weeks mesh network real-time against power failure
- Works as a Bluetooth repeater node to relay communication signal and extend mesh distance
- Stand-alone installation design to fix into junction box

- Input: 120V-277V, 50/60Hz
- Reinforced version with up to 50m transmission distance
- Two styles of antenna to choose from
- Ability to keep up to 12 weeks mesh network real-time against power failure

Bluetooth 5.0 Mesh Modules

KMB01

- Bluetooth 5.0 SIG mesh (BLE) module (*See full details on pg. 05-11)
- L * W * D: 19.2mm * 12.7mm * 1.6mm
- nRF52832 chip design
- Frequency: 2404MHz-2480MHz
- Bluetooth transmission range: up to 50m in open air
- Supply voltage: DC 1.7V-3.6V
- Current consumption: <10mA (normal mode)
- Mobile/tablet app & PC web platform control
- Ready for integration to LED drivers/dimmers etc.
- IoT(Internet-of-Things) featured
- Future proof: Continuous firmware maintenance (OTA)
- Highly open for all customization possibilities

Six Variants Available:

- KMB01-S: On/Off control
- KMB01-DIM: Dimming only
- KMB01-CCT: Dimming and color tuning (PWM output)
- KMB01-DA: Dimming and color tuning (DALI broadcast)
- KMB01-EM: Dimming and color tuning with Emergency function
- KMB01-PIR: For PIR sensor connecting, with daylight sensor and PUSH function
Relay output/PWM output/1-10V putput/DALI output available

NEW!

KMB02

- Bluetooth 5.0 SIG mesh (BLE) module (*See full details on pg. 05-11)
- L * W * D: 19.2mm * 12.7mm * 1.6mm
- nRF52840 chip design
- Frequency: 2404MHz-2480MHz
- Bluetooth transmission range: up to 50m in open air

- KMB02-DA: Dimming and color tuning (DALI broadcast)
- KMB02-EM: Dimming and color tuning with Emergency function
- KMB02-PIR: For PIR sensor connecting, with daylight sensor and PUSH function
Relay output/PVWM output/1-10V putput/DALI output available

DALI-2 Modules

KMD01-DT6

- DALI-2 DT6 module (DALI device type 6)
- L * W * D: 37.5mm * 14mm * 7mm
- DALI dimmable (1% - 100%)
- Comply with IEC62386 -101/102/207 standards
- Supply voltage: DC 8.5V - 12V
- Current consumption: <20mA (±5mA)
- Convert the DALI signal to PWM 1KHz (can be customized)
- With 300Vac protection against overvoltages
- Ready for integration to DALI-2 LED drivers
- DALI terminal with 300Vac protection against overvoltage
- Switch-Dim (PUSH) terminal – same position as DALI terminals
- LED Fault detection
- Conformity: IEC62386-102:2018; IEC62386-207:2018

KMD01-DT8

- DALI-2 DT8 module (DALI device type 8)
- L * W * D: 37.5mm * 14mm * 7mm
- DALI dimmable (1% - 100%)
- Comply with IEC62386-101/102/207 standards
- Supply voltage: DC 8.5V – 12V
- Current consumption: <20mA (±5mA)
- Convert the DALI signal to PWM 1KHz (can be customized)
- With 300Vac protection against overvoltages
- Ready for integration to DALI-2 LED drivers
- DALI terminal with 300Vac protection against overvoltage
- Switch-Dim (PUSH) terminal – same position as DALI terminals
- LED Fault detection
- Conformity: IEC62386-101:2018; IEC62386-102:2018; IEC62386-207:2018; IEC62386-209:2011

HF Modules

NEW!

UC20DC

- Microwave (HF) module
- L * W * D: 20mm * 20mm * 45mm
- On/Off control
- Frequency: 5.8GHz ±75MHz
- Input: 12VDC (≥20mA)
- Output (Max Loading): 5V, TTL
- Max installation height: 6m
- Max detection range: 10m (diameter)
- Daylight sensor: Photodiode (PD)
- Active Lux Switching technology (*See pg. 15)
- Robust HF antenna design against wireless interference (*See pg. 13)

LEB02

- Microwave (HF) module
- L * W * D: 23mm * 22mm * 7mm
- Frequency: 5.8GHz ±75MHz
- Supply voltage: DC 3.3V (can be customized)
- Current consumption: 5mA – 6mA
- High/Low level output or PWM output
- Max installation height: 3m
- Max detection range: 6m (diameter)
- Daylight sensor: Photodiode (PD)
- Active Lux Switching technology (*See pg. 15)
- Programmable sensor parameter settings

NEW!

UC20DC/RC

HRC-05

- Microwave (HF) module
- L * W * D: 20mm * 20mm * 45mm
- Tri-level dimming (*See pg. 01)
- Frequency: 5.8GHz ±75MHz
- Input: 12VDC (≥25mA)
- Output (Max Loading): 5V, PWM
- Max installation height: 6m
- Max detection range: 10m (diameter)
- Robust HF antenna design against wireless interference (*See pg. 13)
- Sensor settings via handset HRC-05

NEW!

SAM12NH

- Microwave (HF) module
- L * W * D: 39mm * 19.5mm * 8.5mm
- Tri-level dimming (*See pg. 19)
- Frequency: 5.8GHz \pm 75MHz
- Input: 12VDC (\geq 25mA)
- Output (Max Loading): 5V, PWM
- Max installation height: 6m
- Max detection range: 10m (diameter)
- Daylight sensor: Photodiode (PD)
- Active Lux Switching technology (*See pg. 15)
- Robust HF antenna design against wireless interference (*See pg. 13)
- Sensor settings via DIP-Switches

- Microwave (HF) module
- L * W * D: 39mm * 19.5mm * 13mm
- Tri-level dimming (*See pg. 01)
- Frequency: 5.8GHz \pm 75MHz
- Input: 12VDC (\geq 25mA)
- Output (Max Loading): 5V, PWM
- Max installation height: 6m

Remote Controller HRC-04

1. Temporary ON/OFF override:

Press this button for temporary ON or OFF. When pressing "AUTO" button or when the fixture is re-powered, then the fixture status will revert back to sensor mode.

4. Scene mode:

There are 4 scene modes fixed program built-in the remote control to choose for different applications, press buttons of detection range/stand-by dimming level/hold-time/stand-by period/daylight sensor to adjust the settings. The last setting stays in validity.

6. Power output:

By pressing this button to select light output at 80% (at initial 10,000 hours) or 100%.

8. Detection range:

Set detection range at 100% / 75% / 50% / 10%.

9. Stand-by dimming level:

Set stand-by dimming level at 10% / 20% / 30% / 50%.

11. Hold-time:

Set hold-time period. 2s is for testing purpose only, stand-by period and daylight sensor settings are disabled in this mode.

13. Stand-by time settings:

Set stand-by time at 0s / 10s / 1min / 10min / 5min / 30min / +∞.

4. Scene mode:

Also known as presence detection / absence detection. In this mode, the light keeps ON in the presence, and dims down in the absence, and eventually switches off in the long absence.

3. Load indication:

The light will flash ONCE rapidly after receiving the command from the remote control successfully.

5. Reset:

All settings goes back to default settings: Detection range: 100%; Hold-time: 1min; Stand-by period: 5min; Stand-by dimming level: 20%; Daylight sensor: Lux disable; Rx 100%

7. RF grouping:

Short press "Learn/Erase" button to activate pairing mode. By pressing "Send" button, the commander will beep and send the transmission signal. Long press "Learn/Erase" button for 3s, and the receiver unit clears all commands it has received before.

10. Brightness on RF signal

Press "Rx 100%" button, the light(s) on slave operate at 100% on upon receiving RF ON signal; Press "Rx STBY%" button, the light(s) switch on at the pre-set stand-by dimming level.

12. Daylight threshold setting & Ambient lux sampling:

Set daylight threshold value 2 lux / 20 lux.
Eye button: study the surrounding lux level and save it as the new daylight threshold / target lux level for daylight harvesting.

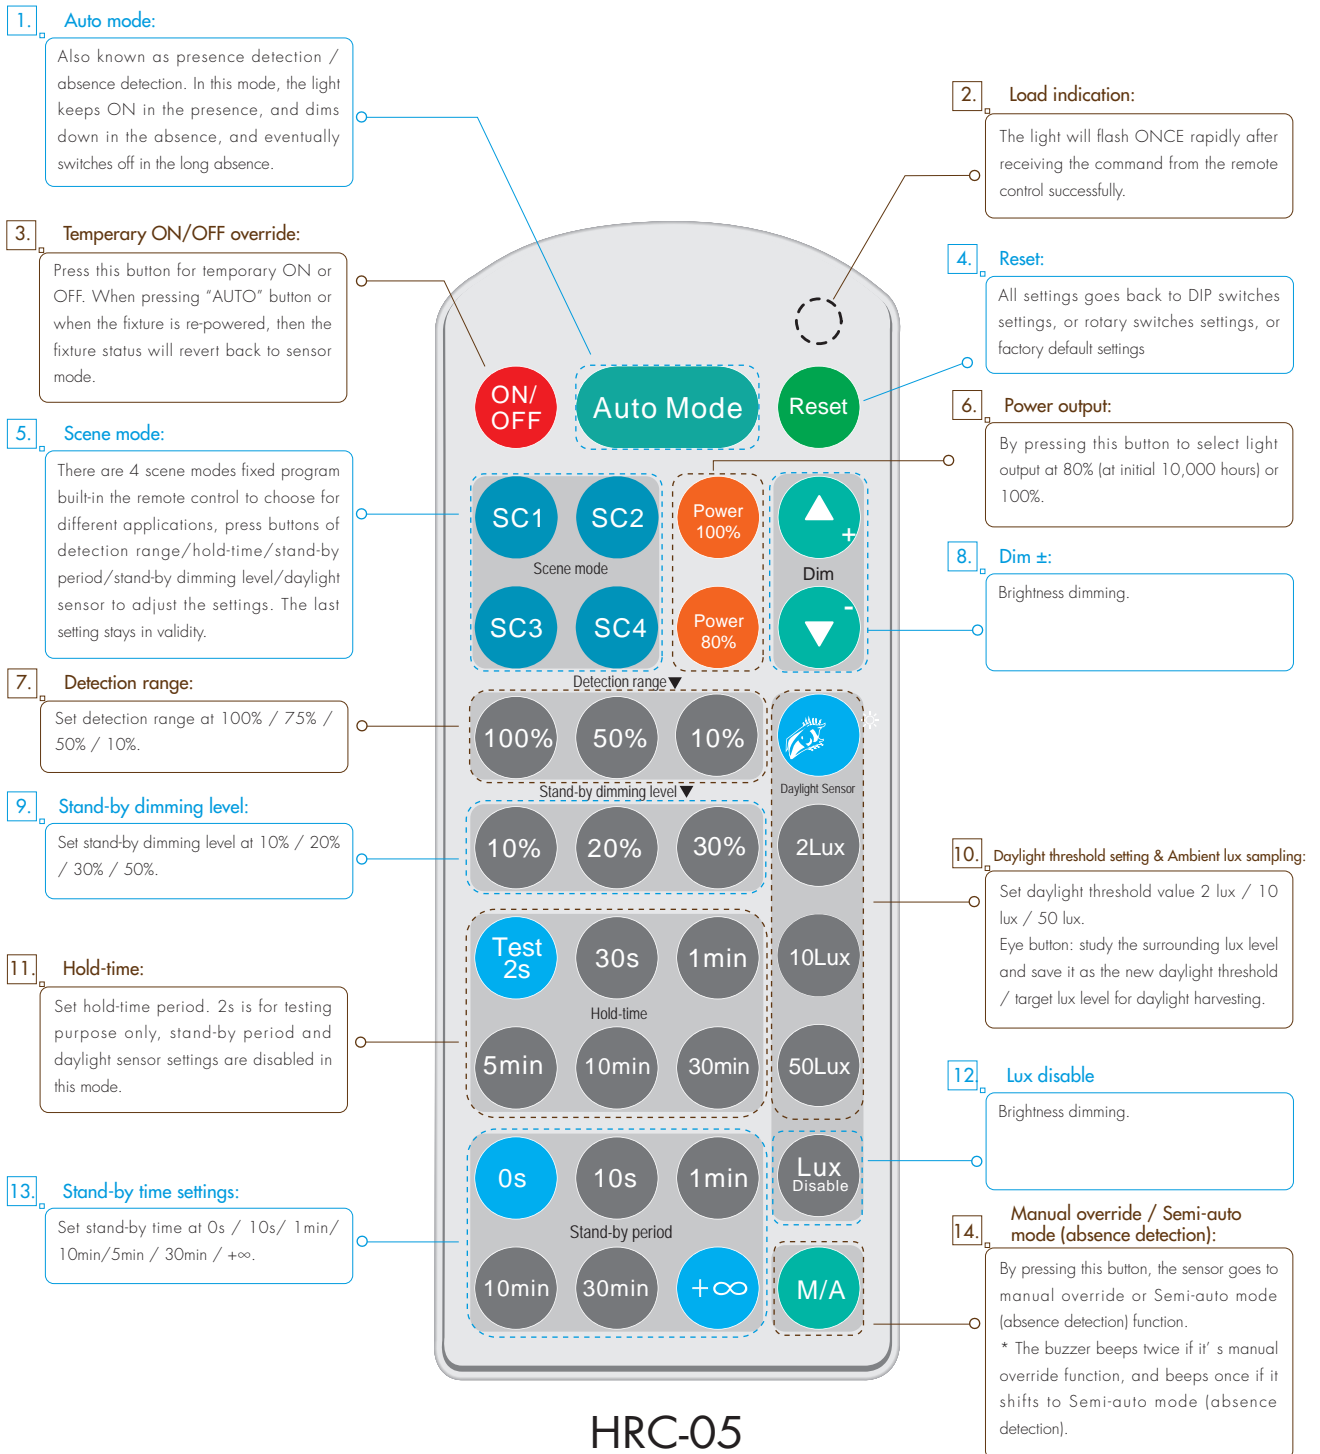

14. Lux disable:

By pressing this button, the built-in daylight sensor stops working, and all motion detected could trigger on the lighting fixture, no matter how bright the natural light is.

Remote Controller HRC-05

Remote Controller HRC-11

1. Auto / Semi-auto:
Also known as presence detection / absence detection. In semi-auto mode, the motion sensor is only activated on the manual press of push switch. The light keeps ON in the presence, and dims down in the absence, and eventually switches off in the long absence.

2. Load indication:
The light will flash ONCE rapidly after receiving the command from the remote control successfully.

3. Temporary ON/OFF override:
Press this button for temporary ON or OFF. When pressing "AUTO" button or when the fixture is re-powered, then the fixture status will revert back to sensor mode.

4. Reset:
All settings goes back to DIP switches settings, or rotary switches settings, or factory default settings

5. Sensor off mode:
The function of motion detection is disabled. The function of photocell is also disabled.

6. Twilight mode:
The function of motion detection is disabled. The function of photocell is still working, and the product becomes a pure dusk / dawn daylight sensor.

7. Power Output:
Press to select light output at 80% (at initial 10,000 hours) or 100%.

8. CCT ±:
Color tuning.

9. One-key commissioning:
Use "Start", "Memory" and "Apply" button to save a set of sensor parameters and send to all the target fixtures, quick and simple!

10. Dim ±:
Brightness dimming.

11. Tri-level & Daylight harvest:
Shift between tri-level control mode and daylight harvest mode.

12. Master DALI sensor in a DALI line:
Select a DALI sensor in a DALI line to be a "master", so that all other DALI sensors in the same DALI line will perform daylight harvesting/tri-level control based on the lux reading from this "master" sensor's daylight sensor.

13. Detection range:
Set detection range at 100% / 75% / 50% / 10%.

14. Daylight threshold setting & Ambient lux sampling:
Set daylight threshold value 2 lux / 10 lux / 50 lux / 100 lux / 300 lux / 500 lux. Eye button: study the surrounding lux level and save it as the new daylight threshold / target lux level for daylight harvesting.

15. Stand-by time settings:
Set stand-by time at 0s / 10s / 1min / 10min / 5min / 30min / +∞.

16. Hold-time:
Set hold-time period. 2s is for testing purpose only, stand-by period and daylight sensor settings are disabled in this mode.

17. 24h auto-configuration:
Select a time period and the sensor will do light level measurement and determine / save the lowest light level (commission line) with 100% on, so as to automatically set the target lux level for daylight harvesting.

18. Stand-by dimming level:
Set stand-by dimming level at 10% / 20% / 30% / 50%.

19. RF pairing mode:
Short press "learn / erase" button to activate pairing mode, then press "transmit" on a primary mode and all the receiver modules will beep 3 times in 1s to indicate the success of pairing. Long press the "learn / erase" button for 3s will erase all the commands received previously.

20. Rx Stand-by:
Choose one of the four detection mode: "HF only", "PIR only", "HF / PIR" or "HF & PIR".

21. Rx Stand-by:
Press button RX100%, the light on receiver unit is 100% upon receiving RF on signal; Press button RX STBY% button, the light(s) goes to pre-set stand-by dimming level directly.

Note:
For On/Off control products, the stand-by time setting still works and accumulates to hold-time. These products include HMW28/PRO, HMW28/H, HMW28VFC/PRO, HC049S, HIR28 series, HMW20, HMW30 and HIM30.e.g. For HC049S, when set hold time to 5min, and set stand-by time to 10min, then the HC049S will be 100% on for 15min before it switches off the fixture.
